GRANTS.GOV SUBMISSIONS SIMPLIFIED WITH CAYUSE

The Cayuse system is entirely web-based and will provide system-to-system proposal submission to Grants.gov. It's features include: Advanced validation of Grants.gov proposals based on sponsor rules, which allows for reduced submission errors, entry of SF-424 data online rather than as a PDF, auto-population of institutional data in the SF-424 and ability for SPO to lock proposals (except the science) after review and allow PI submission after hours.

More information on Cayuse is available here:
<http://spark.ucdavis.edu/cayuse-424/>

Presented by the Office of Research, Sponsored Programs and the Comprehensive Cancer Center.
