Type: ROUTINE INSPECTION

Date: 24-SEP-2024

2.38(f)(1)

Miscellaneous.

On 13 March 2024 a post-surgical ewe was reported to the veterinary staff for potential pain; post op pain control had been discontinued several days prior. The senior vet assessed the animal was showing signs of mild pain and directed the resident to administer analgesia, which was not given until the following day. On 14 March 2024 the ewe was reassessed at the same pain score and administered analgesia, with the notation "prior doses not given" in the medical notes. The ewe continued until the conclusion of the study and appeared to not be impacted by the discomfort. Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause unnecessary discomfort.

Corrected prior to the day of inspection, 24 September, 2024

This inspection and exit interview were conducted with the IACUC staff and the Attending Veterinarian.
