

#### **UC Davis IRB Administration**

### Glossary of Lay Terminology

|  | belly   |
|--|---|
| Abdominal                                    | having to do with the belly   |
| Abdominal cavity                             | space in the belly where the stomach, intestines, kidney, liver, gall bladder, pancreas, spleen, and ureters are found  |
| Abdominocentesis                             | use of needle or tube to drain fluid from the belly   |
| Abdominoperineal resection                   | surgery to remove the middle and end of the large intestine   |
| Abdominoplasty                               | surgery to fix the stomach  |
| Abduction                                    | movement away from the middle of the body   |
| Abortion                                     | the premature end of a pregnancy  |
| Abrasion                                     | area where skin or other tissue is scraped away   |
| Abruptio placentae                           | premature separation of the placenta from the mother  |
| Abscess                                      | swelling filled with pus  |
| Absorb                                       | take up fluids, take in   |
| Absorption                                   | the way a drug or other substance enters the body   |
| Abstinence                                   | not having sexual intercourse   |
| Acapnia                                      | decreased carbon dioxide in the blood   |
| Acceptable                                   | good; decent; capable   |
| Acetabulum                                   | pocket in the hip bone that holds the top of the upper leg bone   |
| Acidosis                                     | increase of acid in the blood   |
| Acne   | pimples   |
| Acoumeter                                    | tool used to measure hearing  |
| Acoustic neuroma                             | growth in the ear canal   |
| Acquired immunodeficiency<br>syndrome (AIDS) | illness that results in decreased ability of the body to protect itse<br>from other illnesses; development of the disease or conditions<br>associated with the disease results from Human<br>Immunodeficiency Virus (HIV) |
| Acromegaly                                   | a disease of adults in which the body makes too much growth hormone   |
| Actinic keratosis                            | skin disease (bumps) caused by too much exposure to the sun   |
| Activated partial thromboplastin ime         | a test of blood clotting time used to measure the ability of the<br>blood to clot   |
| Acuity                                       | clearness, keenness   |
| Acute  | a quick and severe form of illness in its early stage   |

Adapted from: https://www.feinsteininstitute.org/wp-content/uploads/2013/02/Glossary-of-Lay-Terminology 12-15-14.pdf

| Addison's disease              | serious disorder in which there is decreased cortisol and<br>aldosterone in the body, resulting in weakness, low blood<br>pressure, and other serious problems |
|--------------------------------|--|
| Adduction                      | movement toward the middle of the body   |
| Adenohypophysis                | gland in the brain that makes many hormones that control body functions  |
| Adenoidectomy                  | surgery to take out the adenoids   |
| Adenoiditis                    | pain and swelling of the adenoids  |
| Adenoids                       | infection-fighting glands in the back of the throat  |
| Adenomyosis                    | a growth of muscle in the uterus   |
| Adenopathy                     | swollen lymph nodes (glands)   |
| Adenotome                      | tool used to remove adenoids   |
| Adequate                       | Reasonably good  |
| Adhesion                       | tissue stuck together  |
| Adipose                        | having to do with fat  |
| Adjuvant                       | helpful, assisting, aiding   |
| Adjuvant Treatment             | added treatment  |
| Administer                     | give (to)  |
| Administration (of)            | giving (of)  |
| Adrenal gland                  | a gland found over each kidney   |
| Adrenalectomy                  | surgery to remove an adrenal gland   |
| Adrenaline                     | hormone made by the adrenal glands that speeds up body organs<br>and helps the body deal with stress   |
| Adrenalitis                    | inflammation of one or both adrenal glands   |
| Adrenocortical Hormone         | any of the hormones made by the outer layer of the adrenal glands  |
| Adrenocorticohyperplasia       | increased growth of one or both adrenal glands   |
| Adrenocorticotropic Hormone    | hormone made by the brain that activates the adrenal glands  |
| Adrenomegaly                   | increase in size of one or both adrenal glands   |
| Adrenopathy                    | disease of one or both adrenal glands  |
| Adverse Effect/Event/Reaction  | harmful, bad side effect   |
| Aerosol                        | drug or substance made as a mist to be breathed in   |
| Afferent                       | going toward the center area   |
| Afterbirth                     | material that provides nutrition for the unborn baby and comes<br>out after the baby is born   |
| Airway                         | tube through which air passes to enter and leave the lungs   |
| Akathisia                      | feeling of restlessness  |
| Alanine Aminotransferase (ALT) | substance in blood that is measured to check for liver disease   |
| Albino                         | white; lacking color   |

| Albuminuria                            | protein in the urine   |
|--|--|
| Alcohol                                | drug found in whisky, wine, and beer that slows down the central nervous system                    |
| Aldosterone                            | hormone made by the adrenal glands that controls the amount of mineral salts in the body           |
| Allergic Reaction                      | rash, trouble breathing  |
| Allergy                                | over sensitivity to a substance  |
| Alopecia                               | hair loss  |
| Alpha-Fetoprotein                      | substance in blood that is measured to check for liver cancer, testicular cancer, and spina bifida |
| Alzheimer's Disease                    | disorder that causes mental confusion  |
| Ambulate/Ambulation/Ambulatory         | walk, able to walk   |
| Amenorrhea                             | when a woman has no menstrual period   |
| Amniocentesis                          | removal of some of the waters from around an unborn baby for laboratory testing                    |
| Amniochorial                           | having to do with the tissues that surround the unborn baby  |
| Amniography                            | x-ray of the uterus (womb) and unborn baby taken after putting a dye into the bag of waters        |
| Amnion                                 | tissue that covers the unborn baby   |
| Amnionitis                             | inflammation of the amnion   |
| Amniorrhea                             | leaking of waters from around the unborn baby  |
| Amniorrhexis                           | breaking of the amnion   |
| Amnioscope                             | tool passed through the cervix to look at the amniotic fluid and<br>the unborn baby                |
| Amniotic Fluid                         | waters around the unborn baby  |
| Amniotic Sac                           | bag of tissue that surrounds the unborn baby   |
| Amniotomy                              | rupture of the membranes (breaking of the tissues around the unborn baby)- done to start labor     |
| Amphetamines                           | drugs that speed up metabolism and decrease appetite ("speed")                                     |
| Amyotrophic Lateral Sclerosis<br>(ALS) | a disease of the nerves and muscles that causes weakness   |
| Anal                                   | having to do with the anus   |
| Analgesic                              | drug used to control pain  |
| Anaphylactic shock                     | serious allergic reaction to a substance (e.g., food, drug)  |
| Anaphylaxis                            | serious, potentially life threatening allergic reaction  |
| Androgen                               | male sex hormone   |
| Anemia                                 | decreased number of red blood cells  |
| Anesthesia                             | loss of sensation or feeling   |
| Anesthetic                             | drug that is used to produce loss of pain sensation  |
| Anesthetic (General)                   | medication used to stop pain by putting you to sleep   |
| Anesthetic (Local)                     | medication used to decrease pain by numbing an area of your body                                   |
| Anesthetic (Regional)                  | medication used to block pain from the muscle and the skin   |

| Aneurysmectomysurgery to take out an aneurysmAngina/Angina Pectorischest pain due to decreased oxygen being supplied to the heatAngiocarditisinflammation of the heart and the blood vessels entering theAngiomagrowth made up of blood vessels or lymph vessels |       |
|--|-------|
| Angiocarditisinflammation of the heart and the blood vessels entering the<br>growth made up of blood vessels or lymph vessels  |       |
| Angiocarditisinflammation of the heart and the blood vessels entering the<br>growth made up of blood vessels or lymph vessels  |       |
| Angioma growth made up of blood vessels or lymph vessels   |       |
|  |       |
| Angioplasm cramp in the blood vessels  |       |
| Angioplasty surgery to open up a narrow blood vessel   |       |
| Angiorrhaphy stitching a blood vessel  |       |
| Angiostenosis narrowing of the inside of a blood vessel  |       |
| Ankylosing Spondylitis inflammation of the spine causing pain and stiffness  |       |
| Ankylosis joint stiffness  |       |
| Anoplasty surgery to fix the anus  |       |
| Anorexia condition in which person will not eat; lack of appetite  |       |
| Anorexia Nervosa mental disorder in which fear of getting fat results in starvati<br>and weight loss   | on    |
| Anoxia no oxygen   |       |
| Antacid drug used to decrease acid in the stomach (e.g., Tums, Rolai   | ls)   |
| Antecubital. in front of the elbow   |       |
| Antepartum before childbirth   |       |
| Anterior having to do with the front of the body   |       |
| Anterior And Posterior<br>Colporrhaphysurgery to fix weak muscles in the pelvic area   |       |
| Anterior Lobe front part of an organ   |       |
| Anterior Lobe Of The Pituitary part of the pituitary gland that discharges many hormones   |       |
| Antianginal drug used to relieve chest pain  |       |
| Antiarrhythmicdrug used to restore the natural rhythm of the heart   |       |
| Antibiotic drug used to stop or slow down the growth of germs  |       |
| Antibody type of protein that helps protect the body against foreign ma<br>such as bacteria and viruses  | tter, |
| Anticoagulant drug used to thin blood  |       |
| Anticonvulsant drug used to stop seizures  |       |
| Anticubital area inside the elbow  |       |
| Antidiarrheal drug used to stop diarrhea   |       |
| Antidiuretic Hormone hormone made by the pituitary gland that helps the kidneys l water in the body by decreasing urine formation  | eep   |
| Antidote substance used to treat allergic reactions  |       |
| Antiemetic drug used to stop vomiting  |       |
| Antihistamine drug used to treat allergic reaction   |       |
| Antilipidemic a drug that decreases the level of fat(s) in the blood   |       |
| Antimicrobial drug that kills bacteria and other germs   |       |
| Antinauseant drug used to stop nausea and vomiting   |       |
| Antipruitic drug used to stop itching  |       |
| Antiretroviral drug that inhibits certain viruses  |       |

Adapted from: https://www.feinsteininstitute.org/wp-content/uploads/2013/02/Glossary-of-Lay-Terminology 12-15-14.pdf

| Antiseptic          | substance used to stop or slow down the growth of germs  |
|---------------------|--|
| Antitussive         | a drug used to relieve coughing  |
| Antrectomy          | surgery to remove the lower part of the stomach  |
| Antrum              | lower part of the stomach  |
| Anuria              | no urine being made  |
| Anus                | ring of muscle that keeps the opening at the end of the digestive tract closed                   |
| Aorta               | biggest artery in the body   |
| Aortic Stenosis     | narrowing of the aorta where it comes out of the heart   |
| Aortogram           | x-ray of the aorta   |
| Apepsia             | without digestion  |
| Aphagia             | not able to swallow  |
| Aphasia             | not able to speak or write and not able to understand spoken or written words                    |
| Apnea               | stopping of breathing  |
| Aponeurorrhaphy     | stitching of an aponeurosis  |
| Aponeurosis         | strong tissue that joins muscle to bone  |
| Appendectomy        | surgery to remove the appendix   |
| Appendicitis        | inflammation of the appendix   |
| Appendix            | nearly, about  |
| Appropriate         | (the) right; correct   |
| Approximately       | nearly, about  |
| Aqueous Humor       | liquid found in the front of the cavity of the eye   |
| Arachnoid           | middle layer of the meninges   |
| Areola              | dark-colored skin around the breast nipple   |
| Arrhythmia          | uneven heart beat  |
| Arteriogram         | x-ray using a dye to outline an artery   |
| Arterioles          | small branches of arteries   |
| Arteriorrhexis      | breaking of an artery  |
| Arteriorsclerosis   | hardening of the artery  |
| Artery              | the type of blood vessel that carries blood and oxygen from the<br>heart to the rest of the body |
| Arthralgia          | pain in a joint  |
| Arthritis           | joint pain   |
| Arthrocentesis      | use of a needle to remove fluid from a joint   |
| Arthroclasia        | surgery to free up a joint that it is stiff so it cannot move                                    |
| Arthrodesia         | surgery to fasten a joint so it cannot move  |
| Arthrogram          | x-ray of a joint   |
| Arthroplasty        | surgery to fix a joint   |
| Arthrosclerosis     | stiffening of the joints   |
| Arthroscope         | tool used to look into a joint   |
| Arthrotomy          | surgery to cut into a joint  |
| Articular Cartilage | smooth tissue that covers the bones inside a joint   |

| Artificial Insemination          | use of a tool to put sperm into the vagina for the purpose of beginning pregnancy  |
|----------------------------------|--|
| Ascites                          | fluid in the belly   |
| Aspartate Aminotransferase (AST) | substance in blood that is measured to detect liver disease                        |
| Aspermia                         | no sperm   |
| Asphyxia                         | suffocation  |
| Aspirate                         | removing a substance using suction   |
| Aspiration                       | fluid entering lungs   |
| Assay                            | lab test   |
| Assess                           | to learn about (the health/wellness of)  |
| Assigned                         | placed in (into a group)   |
| Associated (with)                | having to do (with)  |
| Asthma                           | breathing disorder in which there is a wheezing and difficulty breathing           |
| Astigmatism                      | flaw in the curve of the eye   |
| Asymptomatic                     | having no symptoms or problems   |
| At Risk                          | having a possibility that something negative may happen                            |
| Ataxia                           | uncontrolled muscle movement   |
| Atelectasis                      | collapse of a lung   |
| Atherosclerosis                  | hardening of the arteries  |
| Atraumatic                       | not damaging to tissue   |
| Atrioventricular Defect          | hole in the heart present at birth   |
| Atrophy                          | wasting away, or decrease in size, of a body organ                                 |
| Audiogram                        | report of a hearing test   |
| Audiologist                      | doctor who studies hearing   |
| Audiology                        | the study of hearing   |
| Audiometer                       | tool used to measure hearing   |
| Audiometry                       | measurement of hearing   |
| Audiotape                        | a cassette tape that is listened to  |
| Aural                            | having to do with the ear  |
| Auricle                          | outside flap of the ear  |
| Auscultation                     | use of a stethoscope to listen to sounds inside the body                           |
| Autism                           | condition causing abnormal perceptions and relationships                           |
| Autoimmune Disease               | disorder in which a person's immune system attacks parts of his<br>or her own body |
| Axilla                           | armpit   |

| B  |   |
|--|---|
| Bacteria                                   | type of germs   |
| Bacterial                                  | having to do with bacteria  |
| Bacterial Analysis                         | test used to detect and identify bacteria   |
| Bacterial Endocarditis                     | bacterial infection of the inner lining of the heart  |
| Bag Of Waters                              | sack containing liquid that surrounds the unborn baby   |
| Balanitis                                  | inflammation of the end of the penis  |
| Balanorrhagia                              | balanitis with discharge of pus from the end of the penis   |
| Balanorrhea                                | discharge of fluid from the penis   |
| Banking                                    | storing a sample of blood, tissue, etc., for future research use  |
| Barbiturates                               | group of drugs that are used for different reasons, including general anesthesia, sedation, and stopping seizures |
| Bartholin's Adentitis                      | inflammation of the mucus-producing glands in the vagina  |
| Bartholin's Glands                         | mucus-producing glands in the vagina  |
| Basal Cell Carcinoma                       | tumor of the skin (type of skin cancer)   |
| Baseline                                   | a patient's medical status before any treatment or research is done   |
| Benefit                                    | a good effect   |
| Benign                                     | not malignant, without serious consequences   |
| Benign Prostatic Hypertrophy               | increase in size of the prostate gland  |
| Beta Blocker                               | drug used to slow down the heart  |
| Beta-HCG (Human Chorionic<br>Gonadotropin) | substance in blood that is measured to detect cancer of the testicles   |
| Bicupsid Valve                             | a valve in the heart that controls the flow of blood by opening and closing with each heart beat                  |
| Bilateral                                  | having to do with both sides of the body  |
| Bile                                       | brown-yellow-green liquid made in the liver and stored in the gallbladder that helps with digestion               |
| Bile Duct                                  | tube that carries bile  |
| Bilirubin                                  | a substance found in bile- a high level of bilirubin in the blood causes jaundice                                 |
| Binding/Bound                              | carried by, to make stick together, transported   |
| Binocular                                  | having to do with both eyes   |
| Bioavailability                            | the extent to which a drug or other substance becomes available to the body                                       |
| Biopsy                                     | removal of tissue so it can be looked at under a microscope   |
| Bleeding Time                              | test to measure how long it takes for a small cut to stop bleeding  |
| Blepharitis                                | inflammation of the eyelid  |

| Blepharoplasty                              | surgery to fix the eyelid  |
|---|--|
| Blepharoptosis                              | drooping of the upper eyelid   |
| Blood                                       | red liquid pumped by the heart   |
| Blood Components                            | red blood cells, white blood cells, electrolytes (salts & minerals), enzymes   |
| Blood Counts                                | Number of white blood cells, red blood cells, and platelets in a blood sample  |
| Blood Pressure (BP)                         | the pressure of blood flowing through blood vessels  |
| Blood Profile                               | series of blood tests  |
| Blood Urea Nitrogen (BUN)                   | substance in blood that is measured to check kidney function   |
| Blood Vessels                               | tubes that carry blood through the body  |
| Bolus                                       | a large amount   |
| Bone Marrow                                 | soft tissue inside bones that makes blood cells  |
| Bone Marrow Biopsy                          | use of a needle to remove bone marrow so that it can be looked at<br>under a microscope  |
| Bone Marrow Transplant                      | putting normal bone marrow from one person into another person   |
| Bone Mass                                   | the amount of [calcium in a given amount of] bone  |
| Borderline Personality Disorder<br>(BPD)    | characterized by instability in mood and interpersonal<br>relationships, suicide attempts, self-injury, role confusion, and<br>impulsive behaviors           |
| Bowel                                       | the intestine  |
| Bradyarrhythmias                            | slow irregular heart beats   |
| Bradycardia                                 | slow heart beat  |
| Bradykinesia                                | moving slow  |
| Bradypepsia                                 | slow digestion   |
| Brain                                       | main part of the central nervous system  |
| Brain Derived Neurotrophic Factor<br>(BDNF) | protein, widely secreted in the hippocampus; has been found to<br>play a role in hippocampal morphology and associated cognitive<br>functions such as memory |
| Brain Stem                                  | joins the brain to the spinal column   |
| Brand Name                                  | commercial name for a drug   |
| Breasts                                     | milk-producing glands of women   |
| Breech Birth                                | when feet, buttocks, or knees come out before head at birth  |
| Brochoconstrictor                           | drug used to make the bronchi tighten up and become narrower   |
| Bronchi                                     | more than one bronchus   |
| Bronchitis                                  | coughing and chest discomfort, inflammation of the bronchi   |
| Bronchoconstriction                         | constriction of the airway; difficulty breathing or shortness of breath  |

| Bronchodilator   | opens the airways, drug used to make the bronchi open up and become bigger                             |
|------------------|--|
| Bronchogenic     | beginning in the bronchus  |
| Bronchogram      | x-ray of the bronchi   |
| Bronchoplasty    | surgery to fix the bronchi   |
| Bronchopneumonia | inflammation of the bronchi and lungs  |
| Bronchoscope     | tool used to look into the bronchi   |
| Bronchospasm     | sudden breathing distress caused by narrowing of the airways in lungs                                  |
| Bronchus         | tube that carries air from the bronchi   |
| Bulimia          | an eating disorder in which a person cannot stop eating and often<br>vomits to make room for more food |
| Bunion           | bone growth inside the base of the big toe   |
| Bursa            | small sack filled with liquid that cushions moving parts, such as two bones in a joint                 |
| Bursitis         | inflammation of the bursa  |
| Bursolith        | stone in a bursa   |
| Bursotomy        | surgery to cut into a bursa  |
| Bypass           | an artificial passageway from one blood vessel to another to get<br>around a blood clot                |

## C

| Cachexia                 | general weakness   |
|--------------------------|--|
| Caffeine                 | drug found in coffee and colas that speeds up the central nervous system, heart rate, and blood pressure |
| Calcaneus                | heel bone  |
| Calcipenia               | low in calcium   |
| Cancellous Bone          | a type of bone that looks like a sponge  |
| Cancer                   | abnormal tissue that grows and spreads in the body until it kills  |
| Cancer Chemotherapy      | treatment of cancer using drugs  |
| Cancer Radiotherapy      | treatment of cancer using x-rays   |
| Cancerous                | having to do with cancer   |
| Capillary                | tiny blood vessel that connects arterioles to venules  |
| Carbohydrates            | type of fuel for the body that includes sugars and starches  |
| Carbuncle                | group of boils on the skin   |
| Carcinoembryonic Antigen | substance in blood that is measured to detect tumors of stomach or intestines                            |
| Carcinogenic             | capable of causing cancer  |

| Carcinoma   | type of cancer   |
|---|--|
| Cardiac   | having to do with the heart  |
| Cardiac Arrest  | stopping of the heart  |
| Cardiac Catheterization                               | putting a catheter into the heart to test for or treat a heart problem   |
| Cardiac Pacemaker                                     | battery-powered tool put under the skin to control the heart rate  |
| Cardiac Scan  | ultrasonographic test to view the structure of the heart   |
| Cardiac Tamponade                                     | squeezing of the heart caused by fluid or blood build-up in the sac around the heart                                 |
| Cardiodynia   | pain in the heart  |
| Cardiogenic   | beginning in the heart   |
| Cardiologist  | doctor who treats disorders of the heart   |
| Cardiology  | medical study of the heart   |
| Cardiomegaly  | increase in the size of the heart  |
| Cardiomyopathy  | disorder of the heart muscle   |
| Cardiopulmonary Bypass                                | artificial passageway through which blood goes around the heart<br>during open-heart surgery                         |
| Cardiopulmonary Resuscitation (CPR)                   | giving artificial respiration and heart massage to try to save a<br>person whose breathing or heart has stopped      |
| Cardiotonic   | drug used to strengthen the pumping action of the heart  |
| Cardiovalvulitis                                      | inflammation of the heart valves   |
| Cardioversion   | use of electric shock to make the heart beat with normal rhythm  |
| Carotid Intima-Media Thickness<br>Study (Carotid IMT) | ultrasound test on blood vessels in the neck; painless test that uses<br>sound waves from a small, hand-held machine |
| Carpal  | having to do with the wrist  |
| Carpal Bones  | wrist bones  |
| Carpal Tunnel Syndrome                                | painful disorder caused by a pinched nerve in the wrist  |
| Carpectomy  | surgery to remove a wrist bone   |
| Carpoptosis   | drooping wrist   |
| Cartilage   | a rubbery type of tissue that pads the joints and keeps the shape of<br>the nose and outside ear flaps               |
| Cataract  | clouding of the lens of the eye  |
| Cathartic   | drug used to stop constipation   |
| Catheter  | flexible, tube-like tool used to take fluids out or put fluids into the body   |
| Catheter – Epidural                                   | a tube placed near the spinal cord used for anesthesia indwelling<br>epidural during operations                      |
| Caudal  | toward the lower side of an organ or structure   |
| Cecum   | the first part of the large intestine, which is shaped like a pouch  |

| Celiotomy                                   | surgery to cut into the abdominal cavity  |
|---|---|
| Cell  | the basic building block of all living things   |
| Cell Membrane                               | layer that surrounds a cell   |
| Cellulitis                                  | inflammation of connective tissue   |
| Central Nervous System (CNS)                | the brain and spinal cord   |
| Central Nervous System Drugs                | drugs that speed up or slow down the central nervous system                                   |
| Central Venous Access Device or<br>Catheter | a catheter placed in a large vein in the chest; such as a Port or PICC                        |
| Cephalagia                                  | headache  |
| Cephalic                                    | related to the head or the head end of the body   |
| Cephalosporin                               | type of antibiotic  |
| Cerebellitis                                | inflammation of the cerebellum  |
| Cerebellum                                  | the part of the brain that controls the movement of the muscles<br>and helps maintain balance |
| Cerebral                                    | having to do with the cerebrum  |
| Cerebral Aneurysm                           | aneurysm in the brain   |
| Cerebral Angiography                        | x-ray of the blood vessels in the brain   |
| Cerebral Palsy (CP)                         | birth disorder of the brain that results in difficulty moving                                 |
| Cerebral Thrombosis                         | blood clot in the brain   |
| Cerebral Trauma                             | damage to the brain   |
| Cerebrospinal Fluid (CSF)                   | the liquid around and in the brain and spinal cord  |
| Cerebrovascular Accident (CVA)              | stroke  |
| Cerebrum                                    | largest part of the brain, divided into right and left side                                   |
| Cerumen                                     | ear wax   |
| Ceruminoma                                  | growth inside the gland that discharges ear wax   |
| Cervical Vertebrae                          | bones of the neck   |
| Cervicectomy                                | surgery to remove the cervix  |
| Cervicitis                                  | inflammation of the cervix  |
| Chalazion                                   | pimple on the eyelid caused by an inflamed gland  |
| CHD   | coronary heart disease  |
| Cheilorrhaphy                               | surgery to stitch a lip   |
| Chemical Name                               | chemical formula for a drug (generic)   |
| Chemotherapeutic Agent                      | anticancer drug   |
| Chemotherapy                                | treatment of disease, usually cancer, by chemical agents                                      |
| Chest Cavity                                | space where the heart, lungs, esophagus, trachea, bronchi, and thymus are located             |
| Chiropodist                                 | doctor who treats disorders of the feet   |

| Chiroproctor                                    | doctor who treats disorders of the spine and nerves   |
|---|---|
| Chlamydia                                       | type of germ that usually infects the eyes, lungs, or sex organs  |
| Chloasma  | a tumor arising from the skin and other organs  |
| Cholangiogram                                   | x-ray of the gallbladder and bile ducts   |
| Cholangioma                                     | cancer of a bile duct   |
| Cholecystectomy                                 | surgery to remove the gallbladder   |
| Cholecystitis                                   | inflammation of the gallbladder   |
| Choledocholithiasis                             | gallstones in a bile duct   |
| Choledocholithotripsy                           | surgery to crush gallstones in a bile duct  |
| Cholelithiasis                                  | gallstones  |
| Cholinergic                                     | type of nerve or a drug used to change its action   |
| Chondrectomy                                    | surgery to remove cartilage   |
| Chondromalacia                                  | softening of joint cartilage, usually inside the knee   |
| Chorea  | Involuntary movements   |
| Chorioamnionitis                                | inflammation of the tissue that covers the unborn baby  |
| Chorion   | outside layer of the tissue that covers the unborn baby   |
| Choroid   | middle layer of the eyeball   |
| Chromosomes                                     | structures that hold the genes  |
| Chronic   | lasting a long time   |
| Chronic Obstructive Pulmonary<br>Disease (COPD) | lung disorder in which the flow of air to the lungs is blocked<br>(e.G., emphysema)   |
| Cicatrix  | scar  |
| Circumcision                                    | surgery to remove the foreskin  |
| Cirrhosis                                       | serious liver disorder in which connective tissue replaces normal<br>liver tissue, and liver failure often occurs               |
| Clavicle  | collarbone  |
| Cleft Lip And Plate                             | birth defect in which there is a split in the lip and the roof of the mouth   |
| CLIA Lab  | certified clinical laboratory that is authorized to release results<br>from patient tests for clinical and diagnostic purposes. |
| Clinical  | pertaining to medical care  |
| Clinical Trial                                  | medical research study in human volunteers  |
| Clinically Significant                          | of major importance for treating or evaluating patients   |
| Clitoris  | sensitive female sex tissue located above the opening for urination   |
| Coagulation Time                                | measure of how long it takes for blood to clot in a test tube   |
| Coarctation Of The Aorta                        | birth disorder in which an area of the aorta is very narrow   |

| Соссух                                 | tailbone  |
|--|---|
| Cochlea                                | the organ of hearing inside the ear   |
| Cognitive                              | mental functioning  |
| Coitus                                 | sexual intercourse between a man and a woman  |
| Colectomy                              | surgery to remove part or all of the colon  |
| Colonoscope                            | tool used to look into the colon  |
| Colonoscopy                            | a medical examination of the colon by a physician using a colonoscope                           |
| Colostomy                              | an opening, or the surgery to make an opening, between the colon<br>and the outside of the body |
| Colpitis                               | inflammation of the vagina  |
| Colporrhaphy                           | stitching of the vagina   |
| Colposcope                             | tool with magnifying glass used to look into the vagina and at the cervix                       |
| Coma                                   | varying degrees of unconsciousness from which a person may not awaken                           |
| Compact Bone                           | hard layers of the bone   |
| Compensation                           | payment or gift to a research subject/volunteer   |
| Complete Response                      | total disappearance of disease  |
| Complications                          | difficulties, problems  |
| Computerized Axial Tomography<br>(CAT) | x-ray machine that uses a computer to make pictures of the body                                 |
| Computerized Tomography (CT)           | x-ray machine that uses a computer to make pictures of the organs of the body                   |
| Conception                             | the beginning of pregnancy when the fertilized egg implants in<br>the uterus                    |
| Conclude/Conclusion                    | end   |
| Concomitant                            | given at the same time  |
| Concussion                             | unconsciousness resulting from a blow to the head affecting the brain                           |
| Condom                                 | cover worn over the penis during sexual intercourse to prevent infection or pregnancy           |
| Confidentiality                        | keeping all information about a research subject/volunteer private                              |
| Congenital                             | occurring prior to birth, due to parent's genetic input   |
| Congenital Anomaly                     | birth defect  |
| Congenital Heart Disease (CHD          | heart disease present at birth  |
| Congenital Heart Failure (CHF)         | failure of the heart resulting in fluid build-up in the lungs, other<br>body tissues, or both   |
| Conjunctiva                            | tissue that lines the eyelids and covers part of the eye inside its sockets                     |

| Conjunctivitis                         | irritation and redness of the thin membrane covering the eye   |
|--|--|
| Connective Tissue                      | type of tissue that connects, supports, touches, and surrounds various body parts  |
| Conscious                              | awake and aware  |
| Consequence                            | result; effect; outcome  |
| Consists Of                            | includes   |
| Consolidation Phase                    | treatment phase intended to make a remission permanent, follows induction  |
| Constipation                           | decreased number of or difficulty making bowel movements   |
| Contagious                             | easily spread  |
| Contraindications                      | medical reasons that prevent a person from using a certain drug or treatment   |
| Control Group                          | group not receiving the experimental treatment   |
| Controlled Trial                       | study in which the experimental treatment or procedure is<br>compared to a standard (control) treatment or procedure                             |
| Contusion                              | bruise   |
| Convulsion                             | seizure  |
| Coombs' Test                           | blood test to detect antibodies against red blood cells that is used<br>in analyzing blood problems and cross matching blood for<br>transfusions |
| Cooperative Group                      | association of multiple institutions to perform clinical trials  |
| Cor Pulmonale                          | heart disease or heart failure caused by a disorder of the lungs   |
| Cornea                                 | clear tissue covering the front part of the eye  |
| Corneoiritis                           | inflammation of the cornea and iris  |
| Coronary                               | pertains to the blood vessels that supply the heart  |
| Coronary Artery                        | artery that supplies blood to the heart  |
| Coronary Artery Bypass Graft<br>(CABG) | surgery to make a new passageway for blood to the heart  |
| Coronary Ischemia                      | not enough blood going to the heart  |
| Coronary Thrombosis                    | blood clot in a coronary artery  |
| Corpus                                 | main portion of a body part or organ   |
| Cortex                                 | outer layer of an organ or other structure in the body   |
| Cortical                               | having to do with a cortex   |
| Corticotropin                          | hormone made by the brain that activates the adrenal glands  |
| Cortisol                               | important hormone made by the adrenal gland that affects metabolism and mineral balance  |
| Costectomy                             | surgery to remove a rib  |
| Cough                                  | sudden, loud flow if air from the lungs  |

| Cranial                    | related to the head or top of the body   |
|----------------------------|--|
| Cranial Cavity             | space inside the skull that holds the brain  |
| Cranioplasty               | surgery to fix the skull   |
| Craniotomy                 | surgery on the skull or to make an opening in the skull  |
| Cranium Bifidum            | birth defect in which there is a crack in the skull  |
| Creatinine Clearance Test  | blood test used to see if the kidneys can effectively remove<br>creatinine from the blood  |
| Cretinism                  | a birth defect in which lack of thyroid hormone results in<br>stopping of physical and mental development  |
| Crohn's Disease            | serious inflammation of any part of the gastrointestinal tract   |
| Crossmatch                 | blood test to check if it is safe to give blood transfusion to a person  |
| Crossover                  | method used to switch subjects from one study group to another<br>in a clinical trial  |
| Croup                      | children's breathing disorder resulting in coughing and harsh breathing  |
| Cryoextraction of the Lens | surgery using low temperatures to remove a cataract  |
| Cryoretinopexy             | surgery of the innermost layer of the eye  |
| Culdocentesis              | removal of fluid from the pouch between the vagina and the rectum  |
| Culdoscope                 | tool used to look into the pouch between the vagina and the rectum   |
| Culture                    | test for infection or organisms that could cause infection   |
| Cumulation                 | increased action of a drug when given over a period of time  |
| Cumulative                 | total sum (of individual events, experiences, treatments)  |
| Curt (Curette)             | spoon shaped tool used for scraping or cutting   |
| Curved                     | having a curved handle or a curved blade   |
| Cushing's Syndrome         | disorder caused by too much of the adrenal hormones or long-<br>time use of cortisone-type drugs in which there are many<br>symptoms, including a fat, round face and weakness |
| Cutaneous                  | relating to the skin   |
| CVA                        | stroke (cerebrovascular accident)  |
| Cyanosis                   | blue color of tissues such as the skin or gums caused by too little oxygen   |
| Cyesiology                 | the study of pregnancy   |
| Cyesis                     | pregnancy  |
| Cyst                       | any closed sac in the body, especially one that contains fluid or<br>semisolid material  |
| Cystectomy                 | surgery to remove the urinary bladder or gallbladder, also, removal of a cyst  |

Adapted from: https://www.feinsteininstitute.org/wp-content/uploads/2013/02/Glossary-of-Lay-Terminology 12-15-14.pdf

| Cystic Fibrosis (CF)  | genetic disorder of glands resulting in lung and digestive problems |
|-----------------------|---|
| Cystitis              | inflammation of the urinary bladder                                 |
| Cystocele             | type of hernia in which the urinary bladder bulges into the vagina  |
| Cystogram             | x-ray of the urinary bladder  |
| Cystolith             | stone in the urinary bladder  |
| Cystolithotomy        | surgery to remove a stone from the urinary bladder                  |
| Cystoscope            | tool used to look into the urinary bladder                          |
| Cystostomy            | surgery to make an opening into the urinary bladder                 |
| Cystotrachelotomy     | surgical cut into the neck of the urinary bladder                   |
| Cystoureterogram      | x-ray of the urinary bladder and ureters                            |
| Cytogenic             | making cells  |
| Cytoid                | like a cell   |
| Cytology              | the study of cells  |
| Cytomegalovirus (CMV) | type of herpes virus  |
| Cytoplasm             | material inside a cell  |
|                       |   |

# D

| Dacryocystorhinostomy       | surgery to make an opening between the tear sac and the nose   |
|-----------------------------|--|
| Dacryocytitis               | inflammation of the tear sac   |
| Debridement                 | surgery to clean foreign material and dead tissue out of a wound   |
| Decubital Ulcer             | bedsore  |
| Deep                        | inside the body  |
| Deep Vein Thrombosis        | blood clot in a deep vein  |
| Defecation                  | making a bowel movement  |
| Defribrillation             | use of electric shock to make the heart start beating, or to correct<br>an abnormal heart rate or rhythm         |
| Dehydration                 | lose of water and minerals in the body.  |
| Delusion                    | a false belief held in the face of strong differing evidence, especially as<br>a symptom of psychiatric disorder |
| Dementia                    | mental decline   |
| Deoxyribonucleic Acid (DNA) | genetic material in the cells in the body that serve as blueprints<br>for making proteins                        |
| Depressant                  | drug that slows down the action of the central nervous system  |
| Dermabrasion                | method used to remove scars from the skin  |
| Dermatitis                  | Skin rash, inflammation  |
| Dermatoautoplasty           | skin grafting using skin from another area of the patient's body   |

| Dermatofibroma               | type of benign skin growth  |
|------------------------------|---|
| Dermatoheteroplasty          | skin grafting using skin from another person  |
| Dermatologic                 | pertaining to the skin  |
| Dermatologist                | doctor who treats disorders of the skin   |
| Dermatome                    | tool used to cut thin slices of the skin to use as skin grafts  |
| Dermatoplasty                | surgery to repair the skin  |
| Dermis                       | inner layer of the skin   |
| Detached Retina              | separation of the retina from the middle layer of the eye   |
| Determine                    | find out, see if  |
| Deviated Septum              | when the inner wall separating the two sides of the nose is off to one side   |
| Diabetes Insipidus           | excessive discharge of urine from the body caused by a<br>deficiency in the quantity of antidiuretic hormone being produced<br>in the body  |
| Diabetes Mellitus            | disorder in which there is decreased insulin in the body or the<br>body's insulin is not effective, resulting in high blood sugar,<br>increased thirst and urine, and many other side effects |
| Diagnosis                    | determination of the cause of a medical problem   |
| Diaphoresis                  | heavy sweating  |
| Diaphragm                    | thin flat muscle that helps with breathing and separates the chest<br>cavity from the abdominal cavity  |
| Diaphragmatocele             | bulging of the abdominal organs into the chest area through a hole in the diaphragm   |
| Diaphysis                    | the long part of arm and leg bones  |
| Diarrhea                     | frequent, loose bowel movement  |
| Diastole                     | the time when the heart rests between contractions and fills with blood   |
| Diastolic                    | lower number in blood pressure reading; pertaining to resting or relaxation phase of heart beat   |
| Digital Rectal Exam          | exam using a finger inside the rectum to feel internal organs such<br>as the prostate gland and uterus  |
| Dilation and Curettage (D&C) | surgery to remove the contents and inner lining of the uterus after<br>a miscarriage or abortion; procedure is also used to treat<br>abnormal bleeding  |
| Dilator                      | tool used for stretching or enlarging an opening or tube  |
| Diplopia                     | seeing double   |
| Discomfort                   | pain  |
| Diskectomy                   | surgery to remove one of the rings between the bones that make<br>up the spine  |
| Dissector                    | tool used to separate or cut apart tissue   |

| Disseminate                             | scatter or spread  |
|---|--|
| Dissociative Symptoms                   | feeling disconnected from your surroundings, or feeling unreal   |
| Distal                                  | toward the end, away from the center of the body   |
| Distended                               | stretched out or swollen, such as a full bladder   |
| Diuresis                                | increased discharge of urine   |
| Diuretic                                | drug used to get excess water out of the body and increase urine;<br>"water pill"  |
| Diverticulectomy                        | surgery to remove abnormal pouch off the colon   |
| Diverticulitis                          | inflammation of abnormal pouches coming off the colon  |
| Diverticulosis                          | abnormal pouches coming off the colon  |
| Doppler                                 | sound waves  |
| Doppler Flow Studies                    | use of ultrasonography to see blood flow inside blood vessels  |
| Dorsal                                  | having to do with the back of the body   |
| Double Blind(ed)                        | a medical research study in which neither the researchers nor the<br>subjects know what treatment the subjects is receiving              |
| Double-Barrier Birth Control<br>Methods | condoms with spermicide, sponge with spermicide, or diaphragm with spermicide  |
| Double-Blind Trial                      | test or experiment in which neither the person giving the<br>treatment nor the patient knows which treatment the patient is<br>receiving |
| Down's Syndrome                         | birth disorder in which there is one extra chromosome, mental<br>retardation, and changed appearance of the head, hands, and feet        |
| Duct                                    | tube that carries a body fluid   |
| Ductus Deferens                         | tube that carries sperm out of the testicle  |
| Duodenal Ulcer                          | sore in the duodenum   |
| Duodenum                                | beginning part of the small intestine  |
| Duodenum                                | first part of the small intestine  |
| Dura Mater                              | outer layer of the meninges (membranes that surround brain and spinal cord)  |
| Duritis                                 | inflammation of the dura mater   |
| Dyscrasia                               | disorder, usually of the blood cells   |
| Dysentery                               | inflammation of the intestine, usually the colon, resulting in pain<br>and in blood and mucus in bowel movements                         |
| Dysfunction                             | state of improper function   |
| Dysmenorrhea                            | painful menstruation   |
| Dyspepsia                               | trouble digesting food with discomfort after meals   |
| Dysphagia                               | trouble swallowing   |
| Dysphasia                               | difficulty speaking and putting words together   |

| Dysphonia                         | trouble with the voice and speaking   |
|-----------------------------------|---|
| Dysplasia                         | abnormal development or cell growth   |
| Dyspnea                           | trouble breathing   |
| Dystocia                          | difficult childbirth  |
| Dystonia                          | disorder that causes focal or generalized sustained muscle<br>contractions, postures, and/or involuntary movements; sudden<br>start of painful twisting and abnormal postures |
| Dysuria                           | pain when urinating   |
| Ε                                 |   |
| Ecchymosis                        | black and blue mark; bruise   |
| Echnocardiogram                   | picture of the heart in motion made using ultrasonography   |
| Echocardiogram                    | sound wave test of the heart  |
| Echoencephalography               | use of ultrasonography to record the shape of the brain   |
| Eclampsia                         | convulsions in a pregnant woman caused by high blood pressure<br>and other medical problems   |
| Ectopic Pregnancy                 | pregnancy growing outside the uterus, often in fallopian tubes  |
| Eczema                            | type of itchy skin rash   |
| Edema                             | swelling caused by fluid held in the tissues  |
| Effective                         | works; works well; works better (than)  |
| Effectiveness                     | working ability   |
| Effects                           | good and bad results  |
| Efferent                          | going away from the center of the body  |
| Efficacy                          | effectiveness   |
| Ejaculation                       | discharge of semen from the penis during the climax of sexual intercourse   |
| Electrocardiogram (ECG or EKG)    | picture of electrical tracing of heartbeat or heart rhythm  |
| Electrocardiograph                | machine that records the electrical action of the heart   |
| Electroencephalogram (EEG)        | picture of electric brainwave tracing of brain activity   |
| Electroencephalograph             | machine that records brain wave activity  |
| Electrolyte Imbalance             | imbalance of minerals in the blood  |
| Elevate                           | raise   |
| Elevation of Liver Function Tests | proof of liver or kidney damage.  |
| Embolectomy                       | surgery to remove a blood clot  |
| Embolus                           | blood clot  |
| Embryo                            | unborn baby from 2 to 8 weeks after it is formed  |
| Embryoid                          | looking like an embryo  |

| Embryology  | the study of the development of the unborn baby  |
|---|--|
| Emesis  | vomiting   |
| Emetic  | drug used to make a person vomit; useful in treating poisoning   |
| Emmetropia  | normal condition of the eye when light focuses correctly on the retina   |
| Emollient   | substance that softens the skin  |
| Emphysema   | disorder in which too much air collects deep in the lungs  |
| Empiric   | based on experience  |
| Encephalitis  | inflammation of the brain  |
| Encephalomyeloradiculitis                                   | inflammation of the brain, the spinal cord, and the spinal nerve roots   |
| Encephalosclerosis  | hardening of the brain   |
| Endocervicitis  | inflammation of the inner lining of the cervix   |
| Endocrinologist   | doctor who treats disorders of the glands that make hormones   |
| Endocrinopathy  | disease of the glands that make hormones; hormonal imbalance   |
| Endometriosis   | growths outside of the uterus made up of the tissues that lines the uterus   |
| Endometritis  | inflammation of the inner lining of the uterus   |
| Endometrium   | inner lining of the uterus   |
| Endophthalmitis   | inflammation of the contents of the eye  |
| Endorphin   | substance made by the body to stop pain  |
| Endoscope   | tool used to look into body structures and hollow organs, such as the stomach  |
| Endoscopic Examination                                      | examination of an internal part of the body with a lighted tube;<br>looking at a part of the body with a lighted tube                      |
| Endoscopic Retrograde<br>Cholangiopancreatography<br>(ERCP) | x-ray of the bile and pancreatic ducts made using an endoscope   |
| Endoscopy   | a thin flexible tube with a microscopic camera at the end which is<br>passed down your throat into the esophagus, stomach, and<br>duodenum |
| Endosteum   | tissue that lines the inside of bone   |
| Endotracheal  | inside the windpipe  |
| Enema   | liquid that is injected into the rectum to promote bowel movement  |
| Enteral   | by way of the intestines   |
| Enterorrhaphy   | surgery to stitch the intestine  |
| Enucleation   | surgery to remove the eye  |
| Epidermal   | having to do with the outer layer of the skin  |

| Epidermis                            | outer layer of skin  |
|--------------------------------------|--|
| Epididymis                           | tubes that stores and carries sperm  |
| Epidural                             | outside the spinal cord  |
| Epigastric Region                    | area above the navel   |
| Epiglottis                           | flap of skin that keeps food from going down the windpipe  |
| Epiglottitis                         | inflammation of the epiglottis   |
| Epilepsy                             | seizure disorder   |
| Epinephrine                          | hormone made by the adrenal glands that speeds up body organs<br>and helps the body deal with stress                                       |
| Epiphysis                            | growth area of a long bone   |
| Episioperineoplasty                  | surgery to fix the vulva and perineum  |
| Episiorrhaphy                        | stitching a tear in the vulva  |
| Episiotomy                           | surgical cut in the vagina to keep it from tearing when a baby is being born   |
| Epistaxis                            | nosebleed  |
| Epithelial                           | having to do with the epithelium   |
| Epithelioma                          | benign or malignant growth made up of epithelial tissue  |
| Epithelium                           | type of tissue that covers the outside of the body and makes up the<br>lining and outer layers of most body organs and parts               |
| Equivalent                           | equal, same  |
| Eradicating                          | getting rid of (such as a disease)   |
| Erosive Esophagitis                  | caused by gastroesophageal reflux; deterioration of the protective<br>lining on the inner wall of the lower esophagus                      |
| Erythema                             | redness  |
| Erythrocyte Count                    | the number of erythrocytes in the blood  |
| Erythrocyte Sedimentation Rate (ESR) | blood test that measures how long it takes for erythrocytes to sink<br>to the bottom of a tube- used to check for inflammation in the body |
| Erythrocytes                         | cells in blood that carry oxygen; red blood cells  |
| Erythrocytosis                       | increase in number of red blood cells  |
| Erythroderma                         | red skin   |
| Esophagogastroduodenoscopy           | use of an endoscope to look into the esophagus, stomach, and duodenum  |
| Esophagoscope                        | tool used to look into the esophagus   |
| Esophagus                            | swallowing tube that transports food from mouth to stomach<br>through the oral cavity, neck and chest                                      |
| Estrogen                             | female sex hormone   |
| Estrogen Receptor Assay              | blood test used to detect tumor cells in patients with breast cancer   |
| Etiology                             | the cause or causes of an illness  |

| Eupnea                   | normal breathing  |
|--------------------------|---|
| Eustachian Tube          | tube that connects the middle ear and the throat  |
| Evaluate                 | rate the level (of health/wellness), judge (the health/wellness of)   |
| Eversion                 | turning inside out  |
| Excretion                | the way that substances leave the body  |
| Exophthalmic             | has a bulging eyeball or eyeballs   |
| Exophthalmos             | bulging of one or both eyeballs   |
| Exostosis                | bony growth on the surface of a bone  |
| Experimental Drug        | Drug not approved for use by the US FDA   |
| Experimental Group       | group receiving the experimental treatment  |
| Extension                | the straight position of an arm or leg  |
| External                 | outside the body  |
| External Auditory Meatus | opening or passageway between the outside of the ear and the eardrum  |
| External Ear             | outside part of the ear   |
| External Genitalia       | sex organs on the outside of the body: penis, scrotum, and urethra<br>in men; vulva, clitoris, and urethra in women |
| Extracorporeal           | outside of the body   |
| Extravasate              | to leak outside of a blood vessel   |
| Extravasation            | escape of blood from blood vessels and into tissue  |

### $\mathbf{F}$

| Fallopian Tube         | tube attached to the uterus down which the egg travels from the ovary to the uterus                                     |
|------------------------|---|
| Fast                   | Nothing to eat or drink (set time varies)   |
| Fasting Blood Sugar    | blood test used to measure the amount of sugar in the blood after<br>not eating or drinking for a set amount of time    |
| FDA                    | United States Food and Drug Administration, the government agency that regulates foods and drugs to assure their safety |
| Feces                  | material excreted during bowel movement   |
| Femoral                | having to do with the thigh area  |
| Femoropopliteal Bypass | surgery to make a passageway from one artery to another in the leg  |
| Femur                  | thigh bone  |
| Fertility              | ability to have children  |
| Fetus                  | unborn baby from 9 weeks afer it is formed until it is born   |
| Fever                  | an increase in body temperature   |
| Fibrillation           | fast uncontrolled heart beat  |

| Fibroid Tumor  | growth made up of fibrous tissue  |
|--|---|
| Fibrous  | having many fibers, such as scar tissue   |
| Fibula   | the lower leg bone behind the shin  |
| Fimbria  | tissue that looks like a fringe on the end of the uterine tubes   |
| First Degree Relative  | a patient's spouse, mother, father, sister, brother, or child   |
| Fissure  | crack or groove in tissue   |
| Flatus   | passing gas   |
| Flexion  | bent position of the arm or leg   |
| Fluorescent Treponemal Antibody<br>Absorption (Fta-Abs) Test | blood test used to detect syphilis  |
| Follow-Up  | returning to see the doctor at a later time   |
| Food And Drug Administration<br>(Fda)                        | government agency that regulates foods and drugs  |
| Forceps  | tool with two blades and a handle used for handling tissue or dressings   |
| Foreskin   | fold of skin that covers the penis and is removed in circumcision   |
| Fracture   | broken bone   |
| Fulguration  | use of electric sparks to remove tissue such as tumors  |
| Fundus   | top of the uterus; or back of the eye   |
| Fungal   | having to do with fungi   |
| Fungal Test  | test used to detect and identify a fungus   |
| Fungi  | more than one fungus  |
| Fungus   | type of living organisms, such as yeasts, molds, and mushrooms,<br>some of which cause infection and some of which look like plants |
| Furuncle   | painful skin boil   |
| G  |   |
| Gadolinium   | contrast material, similar to a dye, to make images appear clearer  |
| Gait   | the way a person walks  |
| Galactorrhea   | too much discharge of milk from the breast  |
| Gallbladder  | small sack under the liver that holds bile  |
| Gamma Globulin   | type of protein in the blood that helps the body fight infection  |
| Ganglion   | group of nerve cells found outside the central nervous system; or a<br>benign tumor on muscle connective tissue or on a tendon      |
| Ganglionectomy   | surgery to remove a ganglion  |
| Ganglionitis   | inflammation of a ganglion  |

| Gangrene                                  | death of tissue caused by loss of blood flow and usually followed by infection  |
|---|---|
| Gastrectomy                               | surgery to remove all or part of the stomach  |
| Gastric Lavage                            | washing the stomach out   |
| Gastric Ulcer                             | sore in the stomach   |
| Gastriodynia                              | pain in the stomach   |
| Gastritis                                 | inflammation of the stomach   |
| Gastroenteritis                           | stomach and intestines upset  |
| Gastroesophageal Reflux Disease<br>(GERD) | frequent persistent heartburn, flow of bitter fluid into mouth,<br>difficulty swallowing, and upper abdominal pain  |
| Gastroscope                               | tool used to look into the stomach  |
| Gastrostomy                               | surgery to make an opening from the outside of the body into the stomach  |
| Gavage                                    | feeding a person through a tube that goes into the stomach  |
| Generic Name                              | chemical name for a drug  |
| Genes                                     | material passed from parent to child that determines the make-up of the body and mind   |
| Genetic                                   | passed down from birth parents in the genes   |
| Genital                                   | having to do with the sex organs  |
| Genital Herpes                            | disease caused by a herpes virus in which there are blisters on the genitalia   |
| Genitalia                                 | male and female sex organs  |
| Gestational                               | pertaining to pregnancy   |
| Gingiva                                   | the gums  |
| Gingivectomy                              | surgery to remove gum tissue  |
| Gingivitis                                | inflammation of the gums  |
| Gland                                     | tissue that produces a material, such as the saliva or a hormone  |
| Glans Penis                               | end of the penis  |
| Glaucoma                                  | increased pressure inside the eye that causes visual problems   |
| Globulins                                 | proteins in the blood   |
| Glomerulonephritis                        | inflammation of the kidney  |
| Glomerulus                                | place in the kidney where urine is formed   |
| Glossitis                                 | inflammation of the tongue  |
| Glossopathy                               | disease of the tongue   |
| Glossorrhaphy                             | surgery to stitch the tongue  |
| Glucocorticoids                           | drugs or natural substances made by the adrenal glands that have<br>many effects on body metabolism, raise sugar level in the blood,<br>and reduce inflammation |

| Glucose                | type of sugar found in the blood   |
|------------------------|--|
| Glucose Tolerance Test | test that measures blood sugar levels over a certain amount of time<br>in a patient after he drinks a beverage that contains a measured<br>amount of sugar |
| Glycosuria             | sugar in urine   |
| Gonad                  | sex gland: female ovary or male testicle   |
| Gonorrhea              | type of bacterial infection in the sex organs and sometimes in the skin and joints   |
| Gout                   | disorder in which crystals of uric acid deposit in and around joints, causing pain and arthritis   |
| Granulocytopenia       | drop in white blood cell count   |
| Growth Hormone (GH)    | hormone made by the pituitary gland that controls the growth of the body   |
| Guaiac Test            | test for blood in stool  |
| Gynecologist           | doctor who treats disorders of the sex organs of women   |
| Gynecology             | the study of the reproductive system of women  |

# H

| 11  |   |
|---|---|
| Hair  | thin strands of protein that grow up from the hair follicles  |
| Hallucinations  | imagining things  |
| Hand and Foot Syndrome; Palmar-<br>Plantar Erthrodyesthesia | palms of the hands or soles of the feet tingle, become numb, painful swollen, or red  |
| Heart   | muscle that moves or pumps blood through the body   |
| Heart Failure   | when the heart inadequately pumps blood through the body  |
| Heart Murmur  | swishing sound, heard when listening to the heart through a stethoscope, caused by abnormal flow of blood through the heart |
| Hematemesis   | blood in vomit  |
| Hematocrit  | amount of red blood cells in the blood  |
| Hematocytopenia   | not enough blood cells  |
| Hematologist  | doctor who treats blood disorders   |
| Hematology  | the study of blood  |
| Hematoma  | a bruise, a black and blue mark   |
| Hematopoiesis   | the making of blood cells   |
| Hematosalpinx   | blood in the uterine tube   |
| Hematuria   | blood in the urine  |
| Hemiparesis   | muscle weakness or partial paralysis, usually with loss of feeling,<br>on half of the body                                  |

| Hemiplegia         | total loss of muscle movement, usually with loss of feeling, on half<br>of the body           |
|--------------------|---|
| Hemodialysis       | method used to remove waste material from the blood   |
| Hemodynamic        | related to blood flow   |
| Hemoglobin (Hgb)   | substance that carries oxygen and gives blood its red color                                   |
| Hemolysis          | breakdown in red blood cells  |
| Hemolytic Anemia   | destruction of red blood cells  |
| Hemophilia         | genetic defect in which blood clots too slowly  |
| Hemorrhage         | bleeding, escape of blood from blood vessels  |
| Hemorrhagic Stroke | stroke due to bleeding  |
| Hemorrhoidectomy   | surgery to remove hemorrhoids   |
| Hemorrhoids        | twisted and bulging veins in the rectal area  |
| Hemostasis         | the stopping of bleeding  |
| Hemothorax         | blood in the chest cavity   |
| Heparin Lock       | needle placed in the arm with blood thinner to keep the blood from clotting                   |
| Hepatitis          | inflammation of the liver   |
| Hepatoma           | cancer or tumor of the liver  |
| Hepatoma           | growth on the liver   |
| Heritable Disease  | a disease which can be transmitted to one's offspring resulting in damage to future children. |
| Hernia             | bulging of an organ through an abnormal opening in a muscle wall                              |
| Herniated Disk     | breaking of a ring-shaped pad in the spine, which often pinches a nerve; slipped disk         |
| Herniorrhaphy      | surgery to fix a hernia   |
| Herpes             | groups of tiny blisters found on the skin caused by infection with a herpes virus             |
| Heterosexual       | person who is attracted to the opposite sex   |
| Hiccup             | sudden, uncontrolled spasm of the diaphragm   |
| Hidradenitis       | inflammation of a sweat gland   |
| Hip Bone           | bone at the lower part of the body trunk  |
| Hirsutism          | abnormal hairiness (in women, an adult male pattern of hair distribution)                     |
| Histology          | the study of tissue under the microscope  |
| Histopathologic    | pertaining to the disease status of body tissues or cells                                     |
| Hodgkin's Disease  | a cancer of white blood cells   |
| Holter Monitor     | a portable machine for recording heart beats  |
| Homosexual         | person who is attracted to the same sex   |

| Hordeolum                             | infection of the oil glands of the eyelids; stye  |
|---------------------------------------|---|
| Hormonal Birth Control Methods        | birth control pill, Norplant, etc.  |
| Hormone                               | substance made by a gland in the body that regulates another part of the body   |
| Hospital Formulary                    | list of drugs and their proper doses maintained by each hospital  |
| Human Immunodeficiency Virus<br>(HIV) | a life-threatening infection which you can get from an infected person's blood or from having sex with an infected person |
| Humeral                               | having to do with the upper arm bone  |
| Humerus                               | upper arm bone  |
| Hydrocephalus                         | increase in fluid in usually causing pressure on the brain; water on the brain  |
| Hydronephrosis                        | abnormal collection of urine in the kidney causing a swollen kidney   |
| Hydrosalpinx                          | fluid in the uterine tube   |
| Hymen                                 | fold of tissue at the opening of the vagina   |
| Hymenectomy                           | surgery to remove the hymen   |
| Hypercalcemia                         | too much calcium in the blood   |
| Hypercapnia                           | too much carbon dioxide in the blood  |
| Hyperesthesia                         | very sensitive to touch   |
| Hyperglycemia                         | too much sugar in the blood   |
| Hyperkalemia                          | high blood potassium level  |
| Hyperkalemia                          | too much potassium in the blood   |
| Hyperkinesis                          | overactive movements  |
| Hypernatremia                         | high blood sodium level   |
| Hyperopia                             | farsightedness  |
| Hyperplasia                           | abnormal increase in the number of normal cells   |
| Hypertension                          | high blood pressure   |
| Hypertensive Heart Disease            | heart problems caused by high blood pressure  |
| Hyperthyroidism                       | overactive thyroid gland  |
| Hyperventilation                      | breathing that is too fast  |
| Hypnotic                              | drug used to make a person sleep  |
| Hypocalcemia                          | not enough calcium in the blood   |
| Hypocapnia                            | not enough carbon dioxide on the blood  |
| Hypochondriac Region                  | area to the right or left above the naval   |
| Hypodermic                            | under the skin  |
| Hypodermic Injection                  | injection of a substance under the skin   |
| Hypoesthesia                          | state of having less than normal sensitivity to stimulation   |
| Hypogastric Region                    | area below the naval  |

| Hypoglycemia                 | not enough sugar in the blood   |
|------------------------------|---|
| Hypokalemia                  | not enough potassium in the blood   |
| Hyponatremia                 | low blood sodium level  |
| Hyponea                      | weak, slow breathing  |
| Hypospadias                  | birth defect in which the urethra opens under the penis instead of<br>the tip of the penis  |
| Hypotension                  | low blood pressure  |
| Hypothermia                  | low body temperature  |
| Hypothyroidism               | underactive thyroid gland   |
| Hypotonia                    | decreased muscle tone   |
| Hypoventilation              | too little air entering the lungs   |
| Hypoxemia                    | a decrease of oxygen in the blood   |
| Hypoxemia                    | not enough oxygen in the blood  |
| Нурохіа                      | a decrease of oxygen in the blood   |
| Нурохіа                      | not enough oxygen in the tissues  |
| Hysteratresia                | birth defect in which the uterus does not open to the outside of the body                   |
| Hysterectomy                 | surgery to remove the uterus  |
| Hysteropexy                  | surgery to fasten down the uterus in its normal position                                    |
| Hysterosalpingography        | taking an x-ray of the uterus and the uterine tubes using a dye to outline them             |
| Hysterosalpingo-Oophorectomy | surgery to remove all of the internal female reproductive organs                            |
| Hysteroscope                 | tool used to look into the uterus   |
| Ι                            |   |
| Iatrogenic                   | caused by a physician or by treatment   |
| Iatrology                    | the science of medicine   |
| Icterus                      | too much bile in the blood causing a yellow color to the skin, gums, eye, and other tissues |
| Idiopathic                   | of unknown cause  |
| Idiosyncrasy                 | rare side effect of a drug; unusual reaction of a person to a drug                          |
| Ileocecal                    | having to do with the ileum and the cecum   |
| Ileum                        | third and last part of the small intestine  |
| Ileus                        | blockage of the intestines  |
| Iliac Regions                | areas to the right and left below the naval   |
| Iliofemoral                  | having to do with the hip and thigh bones   |
| Ilium                        | wing-shaped upper part of the hip bone  |

| Immune Globulins                    | proteins that help protect the body from infection and foreign matter   |
|-------------------------------------|---|
| Immune System                       | the cells and substances that protect the body from infection and foreign matter  |
| Immunity                            | protection against infection  |
| Immunodeficiency                    | weakness of the immune system   |
| Immunoglobin                        | a protein that makes antibodies   |
| Immunosuppresive                    | drug which suppresses the body's immune response, used in<br>transplantation and diseases caused by disordered immunity |
| Immunotherapy                       | giving of drugs to help the body's immune (protective) system;<br>usually used to destroy cancer cells                  |
| Impaired function                   | abnormal function   |
| Impedance Plethysmography           | test used to find blood clots   |
| Impetigo                            | skin infection  |
| Implanted                           | placed in the body  |
| Impotent                            | not able to have or to keep an erection during sexual intercourse   |
| Inclusion Criteria                  | the characteristics a subject must have to be included in a medical research study                                      |
| Incontinence                        | not able to control bladder or bowel actions  |
| Induction Phase                     | beginning phase or stage of a treatment   |
| Induration                          | hard spot   |
| Indwelling                          | remaining in a given location, such as a catheter   |
| Infarct                             | death of tissue because of lack of blood supply   |
| Infectious Disease                  | disease which is transmitted from one person to next  |
| Inferior                            | toward the lower part of the body   |
| Inflammation                        | pain and swelling   |
| Inflammation                        | swelling, redness, and pain in tissues caused by injury or damage   |
| Inflammatory Bowel Disease<br>(IBD) | Crohn's disease, ulcerative colitis, indeterminate colitis  |
| Influenza                           | the flu   |
| Infusion                            | a fluid or a medicine delivered into a vein by way of a needle  |
| Ingestion                           | eating; taking by mouth   |
| Inhalant                            | substance given through the nose or mouth to reach the lungs  |
| Inheritance                         | something passed down from birth parents  |
| Inherited                           | a characteristic or condition that is passed down from birth parents  |
| Initial                             | first   |
| Institutional Review Board (IRB)    | the committee that oversees research at the institution   |
| Insulin                             | the hormone that controls blood sugar levels  |

| Interfere                              | get in the way of  |
|--|--|
| Interictal                             | happening between seizures   |
| Interior                               | inside of the body   |
| Intermittent                           | occurring (regularly or irregularly) between two time points;<br>alternately ceasing and beginning                     |
| Intermittent Claudication              | On-again, off-again pain and weakness in legs which interferes with walking  |
| Internal                               | within the body  |
| Intervention                           | a treatment given during the course of a research study  |
| Intervertebral Disks                   | pads found between each ring (bone) in the spine   |
| Intracavity Injection                  | injection of a substance into a body cavity  |
| Intracoronary Thrombolytic<br>Therapy  | injection of medicine to dissolve a blood clot in an artery of the heart   |
| Intracranial                           | inside the skull   |
| Intradermal Injection                  | injection of a substance into the skin   |
| Intradermal Tests                      | allergy tests performed by injecting allergy-causing substances<br>underneath the skin to see if they cause a reaction |
| Intradermally                          | given into the skin  |
| Intramuscular (IM)                     | into the muscle  |
| Intramuscular Injection (IM)           | injection of a substance into a muscle (e.g., upper arm pr backside)   |
| Intraocular                            | within the eye   |
| Intrathecal                            | into the spinal fluid  |
| Intrathecal Injection                  | injection of a substance into the space surrounding the spinal cord (i.e., spinal canal)                               |
| Intravenous (IV)                       | into a vein  |
| Intravenous (IV) Injection             | injection of a substance into a vein   |
| Intravenous (IV) Line                  | a special needle designed to stay in a vein  |
| Intravenous Pyelogram                  | x-ray of the kidneys and ureters using dye that is injected into the blood   |
| Intravesical                           | in the bladder   |
| Intubate                               | to insert a tube into the mouth or nose to assist in breathing   |
| Intussusception                        | telescoping of the intestine into itself   |
| Invasive Procedure                     | puncture, opening or cutting of the skin   |
| Inversion                              | turning inward   |
| Investigation                          | study  |
| Investigational                        | experimental   |
| Investigational Device Exemption (IDE) | the license to test an unapproved new medical device   |

| Investigational New Drug (IND) | drug not yet approved by the FDA   |
|--------------------------------|--|
| Iritis                         | inflammation of the iris   |
| Irritable Bowel Syndrome       | bowel disorder in which there is pain and diarrhea or constipation   |
| Ischemia                       | decreased oxygen in a tissue (usually because of decreased blood flow)   |
| Ischemic Stroke                | stroke due to a blood clot   |
| Ischium                        | lower part of the pelvic bone, part you sit on   |
| Islets Of Langerhans           | tissue in the pancreas that makes and discharges insulin and other<br>hormones   |
| Isthmus                        | thin strip of tissue that joins two parts of the body  |
| J                              |  |
| Jaundice                       | too much bile in the blood causing a yellow color to the skin, gums, eye, and other tissues  |
| Jejunum                        | second and longest part of the small intestine   |
| Κ                              |  |
| Kaposi's Sarcoma               | purple or brown cancerous pimples on the skin, often associated with AIDS  |
| Karyocyte                      | cell with a center   |
| Karyoplasm                     | material inside the center of a cell   |
| Keloid                         | type of scar tissue that keeps growing inside  |
| Keratin                        | protein that is found in the hair, nails, and skin   |
| Keratoplasty                   | surgery to fix the cornea  |
| Ketone Bodies                  | substances that increase in the blood and urine when too much<br>body fat and too many carbohydrates are being broken down,<br>usually because of starvation or serious, untreated diabetes mellitus |
| Kidney                         | one of two organs in the lower back that filter blood and make urine   |
| Kyphosis                       | hunchback  |
| L                              |  |
| Labyrinth                      | structure in the inner ear   |
| Labyrinthectomy                | surgery to remove the inner ear  |
| Labyrinthitis                  | inflammation of the inner ear  |
| Laceration                     | torn, ragged cut   |
| Lacrimal                       | having to do with the tears  |
| Lacrimal Duct                  | passageway in the eyelids that drains tears; a type of tear duct   |

| Lactating                             | making milk  |
|---------------------------------------|--|
| Lactic Dehydrogenase (LDH)            | substance measured in a blood test to assess damage to heart and other organs  |
| Lactogenic                            | causing the making of breast milk  |
| Lactorrhea                            | too much discharge of milk from the breast   |
| Laminectomy                           | surgery to remove the top of vertebra  |
| Laparoscope                           | tool used to look into the abdominal cavity  |
| Laparoscopy                           | surgery using an laparoscope to see internal organ through a small incision  |
| Laparotomy                            | surgery to make an opening into the wall of the belly to look inside<br>with a laparoscope   |
| Large Intestine                       | the bowel between the small intestine and the anus, including the cecum, colon, and rectum   |
| Laryngeal                             | having to do with the voice box  |
| Laryngeal Nerve                       | nerve in the throat  |
| Laryngectomy                          | surgery to remove the voice box  |
| Laryngitis                            | inflammation of the voice box  |
| Laryngocentesis                       | surgery to puncture the voice box  |
| Laryngoplasty                         | surgery to fix the voice box   |
| Laryngoscope                          | tool used to look into the voice box   |
| Laryngospasm                          | sudden, uncontrolled cramp in the voice box  |
| Laryngostomy                          | surgery to make an opening into the voice box  |
| Laryngotracheobronchitis              | inflammation of the larynx, windpipe, and bronchi; croup   |
| Larynx                                | voice box  |
| Laser Angioblast                      | using a laser light to open blocked arteries   |
| Lateral                               | toward or having to do with the side of the body   |
| Latex Agglutination Test              | blood test used to detect antibodies   |
| Laxative                              | drug used to stop constipation   |
| LE (Lupus Erythematosus)-Cell<br>Test | blood test used to detect the presence of a certain type of white<br>blood cell seen in people with lupus erythematosus and similar<br>disorders |
| Legionnaires' Disease                 | serious disorder caused by bacterial infection in which there is high<br>fever, stomach pain, headache, and pneumonia                            |
| Leiodermia                            | disorder in which the skin is too smooth and shiny   |
| Leiomyoma                             | smooth muscle growth   |
| Leiomyosarcoma                        | cancer of smooth muscle  |
| Lens                                  | structure in the eye that is normally clear and helps to focus light coming into the eye   |
| Lesion                                | abnormal area of tissue, such as a wound, sore, rash, or boil  |

| Lethargy                           | sleepiness  |
|------------------------------------|---|
| Leukemia                           | blood cancer  |
| Leukocoria                         | white pupil   |
| Leukocyte                          | one of the infection-fighting cells in the blood and body tissues;<br>white blood cells                   |
| Leukocyte Count                    | number of white blood cells in the blood  |
| Leukocytosis                       | increase in number of white blood cells in the blood  |
| Leukoderma                         | white skin  |
| Leukokoria                         | white pupil   |
| Leukopenia                         | low white blood cell count  |
| Libido                             | sexual desire   |
| Ligament                           | elastic tissue that connects bone or cartilage  |
| Lipid Content                      | fat content in the blood  |
| Lipid Tests                        | blood tests that measure how much fat is in the blood   |
| Lipids                             | fats  |
| Lipoid                             | fatty   |
| Lipoma                             | growth made up of fat cells   |
| Lipoprotein Electrophoresis        | blood test that measures the amounts of fat and protein in the blood                                      |
| Lithotripsy                        | surgery or other method to crush a stone  |
| Liver                              | large organ that helps in many body functions, including digestion, metabolism, and storage of substances |
| Lobar Pneumonia                    | bacterial infection of one or more sections of the lung   |
| Lobectomy                          | surgery to remove a section of the lung   |
| Localized                          | restricted to one area, limited to one area   |
| Lochia                             | normal discharge from the vagina for 1 to 2 weeks after childbirth  |
| Long Bone                          | bone that is long and slender, such as a leg or arm bone  |
| Long-Term Extension                | continuation of a research study  |
| Lordosis                           | forward curving of the spine, causing saddle back or swayback   |
| Lou Gehrig's Disease (ALS)         | a disease of the nerves and muscles that causes weakness  |
| Lower GI (Gastrointestinal) Series | x-ray using a dye given as an enema to outline the large intestine  |
| Lumbar Puncture                    | spinal tap using a needle to remove spinal fluid for testing from the lower back                          |
| Lumbar Region                      | lower back of the body  |
| Lumbar Vertebrae                   | bones of the spine in the lower back  |
| Lumen                              | the space inside a tube-like body structure, such as a blood vessel                                       |
| Lung Fibrosis                      | excess of fibrous tissue in the lung  |
| Lung Lobe                          | one of five sections of the two lungs   |

| Lungs                               | the two main organs for breathing   |
|-------------------------------------|---|
| Lupus Erythematosus (LE)            | chronic disorders of connective tissue in which there can be skin<br>rash, arthritis, kidney problems, and anemia, among other problems |
| Lymph                               | clear liquid tissue   |
| Lymph Node                          | tissue that filters disease germs from the blood; also called a lymph gland   |
| Lymphadenitis                       | inflammation of the lymph nodes   |
| Lymphadenography                    | x-ray of the lymph nodes  |
| Lymphangiography                    | an x-ray of the lymph nodes or tissues after injection of dye in lymph vessels  |
| Lymphocyte                          | a type of white blood cell important in immunity and defense<br>against infection   |
| Lymphoid Tissue                     | tissue that contains lymphocytes  |
| Lymphoma                            | a cancer of the lymph nodes (or tissues)  |
| Μ                                   |   |
| Magnetic Resonance Imaging<br>(MRI) | body pictures created using magnetic waves to look at soft tissues<br>of the body   |
| Malaise                             | a vague feeling of bodily discomfort, feeling bad   |
| Malfunction                         | condition in which something is not functioning properly  |
| Malignancy                          | cancer or other progressively enlarging and spreading tumor,<br>usually fatal if not successfully treated                               |
| Malignant                           | cancerous   |
| Mammary Glands                      | milk-producing tissue in the breasts  |
| Mammary Papilla                     | breast nipple   |
| Mammogram                           | x-ray of the breast   |
| Mammoplasty                         | surgery to reconstruct the breast   |
| Mandible                            | lower jaw bone  |
| Mantoux Test                        | skin test used to check for tuberculosis  |
| Mastalgia                           | pain in the breast  |
| Mastectomy                          | surgery to remove a breast  |
| Mastitis                            | inflammation of the mammary gland or of the breast  |
| Mastoid Cells                       | air spaces inside the mastoid process   |
| Mastoid Process                     | protruding part of a bone located in the skull behind the ear   |
| Mastoidectomy                       | surgery to remove the mastoid process or mastoid cells  |
| Mastoiditis                         | inflammation of the air spaces in the mastoid process that<br>communicate with the middle ear   |
| Mastoidotomy                        | surgery to cut into the mastoid process   |

| Mastoptosis             | drooping breasts  |
|-------------------------|---|
| Matatarsal Bones        | foot bones  |
| Maxilla                 | upper jaw bone  |
| Maxillectomy            | surgery to remove the upper jaw bone  |
| Maxillitis              | inflammation of the upper jaw bone  |
| Meconium                | first stool of the newborn  |
| Medial                  | toward or having to do with the middle of the body  |
| Mediastinum             | tissue and organs in the middle of the chest between the two lungs  |
| Medical History         | information about a patient obtained by questioning the patient and the patient's family  |
| Medical Record          | a chart containing all of the patient's personal information, doctor's<br>notes, nurse's notes, test results, and treatment information that<br>may be kept by a hospital or clinic |
| Medications             | medicines, drugs  |
| Medulla Oblongata       | part of the brain that controls breathing, blood pressure, and other<br>important body functions; brain stem  |
| Medullablastoma         | a type of brain tumor   |
| Megaloblastosis         | change in red blood cells   |
| Meibomian Cyst          | pimple on the eyelid caused by an inflamed gland (stye)   |
| Melanin                 | material that makes the color of the skin and hair  |
| Melanoma                | cancerous black growth on the skin  |
| Melasma                 | a blotchy brown stain on the skin, usually over the cheeks,<br>forehead, or neck; often associated with pregnancy, menopause, or<br>the use of oral contraceptives                  |
| Menarche                | time in life when a girl starts having a menstrual period   |
| Meniere's Disease       | disorder of the inner ear in which there is dizziness, ringing in the ears, and loss of hearing   |
| Meninges                | three-layered tissue that covers the brain and spinal cord  |
| Meningitis              | inflammation of the meninges  |
| Meningocele             | bulging of the meninges through a hole in bone  |
| Meningomyeloradiculitis | inflammation of the meninges and roots of the spinal nerves   |
| Meniscectomy            | surgery to remove a meniscus  |
| Meniscitis              | inflammation of the meninges and roots of the spinal nerves   |
| Meniscus                | one of two crescent-shaped pads inside the knee joint   |
| Menometrorrhagia        | too much bleeding from the uterus during menstruation and at other times  |
| Menopause               | time in life when a woman stops having a menstrual period   |
| Menses                  | discharge of blood and tissue from the uterus that happens about<br>every 4 weeks in women who are not pregnant   |

| Menstrual               | having to do with menstruation  |
|-------------------------|---|
| Menstrual Period        | the time of menstruation  |
| Menstruation            | monthly discharge of blood and tissue from the uterus when females are not pregnant   |
| Metabolism              | total of all the important actions in the body that keep it alive   |
| Metabolize              | process of breaking down substances in the cells to obtain energy   |
| Metacarpal Bones        | bones of the hand between the wrist and fingers   |
| Metastasis              | spread of cancer cells from one part of the body to another   |
| Metrorrhea              | discharge from the uterus   |
| Micro-                  | describes something that is small or delicate   |
| Microcephalus           | person with a very small head   |
| Micturate               | urinate   |
| Middle Ear              | the space between the eardrum and the inner ear   |
| Migraine                | type of severe headache that occurs periodically and is often<br>associated with nausea, vomiting, and constipation or diarrhea |
| Mild                    | not serious   |
| Minimal                 | slight  |
| Minimize                | reduce  |
| Miotic                  | substance that makes the pupil of the eye smaller (e.g., narcotic)  |
| Miscarriage             | loss of an unborn baby from the uterus before it is able to survive<br>outside the mother's body                                |
| Mitral Commissurotomy   | surgery to repair the mitral valve to enlarge the opening between<br>the two parts of the left side of the heart                |
| Mitral Valve            | valve between two chambers on the left side of the heart  |
| Mobility                | ease of movement  |
| Moderate                | medium level of seriousness   |
| Monitor                 | watch carefully   |
| Monoclonal Antibody     | laboratory produced substance that recognized a specific protein  |
| Monoparesis             | weak muscle movement and loss of feeling in one arm or one leg  |
| Monoplegia              | loss of movement and loss of feeling in one arm or one leg  |
| Morbidity               | undesired result or complication  |
| Mortality               | death   |
| Motility                | ability to move   |
| Mouth                   | opening through which food passes into the body to be digested  |
| Mucopurulent            | slimy and with pus in it  |
| Mucosa                  | lining  |
| Mucosa, Mucous Membrane | moist lining of digestive, respiratory, reproductive, and urinary tracts  |

Adapted from: https://www.feinsteininstitute.org/wp-content/uploads/2013/02/Glossary-of-Lay-Terminology\_12-15-14.pdf

| Mucus                      | slimy fluid   |
|----------------------------|---|
| Multicenter                | when more than one hospital or medical school team work on a medical research study   |
| Multigravida               | women who has been pregnant two or more times   |
| Multipara                  | woman who has given birth two or more times   |
| Multiple Dose              | getting more than one dose of medicine  |
| Multiple Sclerosis (MS)    | slowly worsening disorder of the central nervous system that causes<br>weakness, incoordination, numbness, and problems talking and<br>seeing |
| Muscle                     | type of tissue that causes movement   |
| Muscular Dystrophy (MD)    | genetic problem resulting in muscle weakness and atrophy  |
| Myalgia                    | muscles aches   |
| Myasthenia                 | muscle weakness   |
| Myasthenia Gravis          | disorder that causes muscles to get tired quickly   |
| Mydriatic                  | substance that makes the pupil of the eye bigger  |
| Myelodysplasia             | blood cancer  |
| Myelogram                  | x-ray of the spinal cord using dye that is injected into the spinal area  |
| Myeloma                    | cancer of the types of cells normally found in bone marrow  |
| Myelomalacia               | softening of the spinal cord  |
| Myocardial                 | pertaining to the heart   |
| Myocardial Infarction (MI) | heart attack  |
| Myocardial Ischemia        | not enough blood going to the heart   |
| Myocarditis                | inflammation of the heart muscle  |
| Myocardium                 | muscle of the heart   |
| Myoma                      | growth made up of muscle tissue   |
| Myomectomy                 | surgery to remove a myoma or a piece of muscle  |
| Myometritis                | inflammation of the muscle of the uterus  |
| Myometrium                 | muscle of the uterus  |
| Myopathy                   | muscle disorder   |
| Myopia                     | nearsightedness   |
| Myoplasty                  | surgery to fix a muscle   |
| Myorrhaphy                 | surgery to stitch a muscle  |
| Myringitis                 | inflammation of the eardrum   |
| Myringoplasty              | surgery to fix a ruptured eardrum   |
| Myxedema                   | disorder caused by lack of thyroid hormone in which areas of the skin are swollen   |

| Ν                                      |  |
|--|--|
| Nail                                   | tough plate of tissue covering the top of the end of each finger and toe   |
| Narcotic                               | strong habit-forming drug that stops pain and depresses the central nervous system                               |
| Nasal                                  | having to do with the nose   |
| Nasal Septum                           | wall that divides the nose into two sides  |
| Nasogastric Tube (NG Tube)             | tube that goes through the nose and into the stomach   |
| Nasolacrimal Duct                      | tube that drains tears from the eye into the nose; tear duct   |
| Nasopharyngeal                         | having to do with the nasopharynx  |
| Nasopharyngitis                        | inflammation of the nasopharynx  |
| Natal                                  | having to do with childbirth   |
| National Cancer Institute (NCI)        | institute that supports cancer centers, funds research and training,<br>and provides cancer information          |
| National Institutes of Health<br>(NIH) | the nation's premier biomedical research organization  |
| Nausea                                 | feeling sick to your stomach   |
| Nebulizer                              | device used to turn liquids into mists for breathing treatments  |
| Necrosis                               | death of an area of tissue or skin   |
| Neonate                                | newborn infant   |
| Neonatology                            | the study of disorders of newborn infants  |
| Neoplasia                              | tumor, may be benign or malignant  |
| Neoplasm                               | new growth that is not normal; tumor   |
| Nephrectomy                            | surgery to remove a kidney   |
| Nephritis                              | kidney inflammation  |
| Nephroblastoma                         | type of malignant kidney tumor   |
| Nephrogram                             | x-ray of the kidney  |
| Nephrohypertrophy                      | overgrowth of the kidney   |
| Nephrolithiasis                        | stones in the kidney   |
| Nephroma                               | growth in the kidney   |
| Nephromegaly                           | overgrowth of the kidney   |
| Nephropexy                             | surgery to tie down a kidney   |
| Nephroptosis                           | sagging kidney   |
| Nerve                                  | string-like tissue that carries messages to and away from the brain<br>and spinal cord and tells muscles to move |
| Nervous Tissue                         | type of tissue that makes up the central nervous system and nerves   |

| Neuralgia                       | nerve pain   |
|---------------------------------|--|
| Neurectomy                      | surgery to remove part of a nerve  |
| Neuritis                        | inflammation of a nerve  |
| Neuroarthropathy                | disorder of the joints and the central nervous system or nerves  |
| Neuroblast                      | cell that will develop into a nerve  |
| Neuroblastoma                   | a cancer of nerve tissue   |
| Neurohypophysis                 | part of the brain that discharges hormones including oxytocin and vasopressin  |
| Neuroid                         | like a nerve   |
| Neurological                    | pertaining to the nervous system   |
| Neurologist                     | doctor who treats disorders of the central nervous system and nerves   |
| Neurolysis                      | surgery to open the covering of a nerve to destroy a nerve   |
| Neuroma                         | growth made up of nerve tissue   |
| Neuropathy                      | a disturbance in the function of the brain or spinal cord that may<br>affect the nerves and muscles of the body                  |
| Neuropharmacologic Drug         | drug that acts on the nervous system   |
| Neuroplasty                     | surgery to fix a nerve   |
| Neurorrhaphy                    | stitching a cut nerve  |
| Neurosis                        | mental and emotional disorder  |
| Neurotomy                       | surgery to make a break in a nerve   |
| Neutropenia                     | a decrease in white blood cells  |
| Nevus                           | mole; birthmark  |
| Nocturia                        | too much urination at night  |
| Non-Hodgkin's Lymphoma<br>(NHL) | cancer of the lymph nodes  |
| Non-invasive                    | not breaking, cutting or entering the skin   |
| Norepinephrine                  | hormone discharged from nerves, the brain, and the adrenal glands<br>that helps the body deal with stress and low blood pressure |
| Nosocomial                      | acquired in the hospital   |
| Nucleus                         | center of a cell   |
| Nulligravida                    | woman that has never given birth   |
| Nullipara                       | woman that has never given birth to an infant that lived   |
| Nyctalopia                      | difficulty seeing at night   |

Obesity

very overweight

| Obligated               | have to; must   |
|-------------------------|---|
| Observe                 | watch; look at  |
| Obstetrician            | doctor who takes care of pregnant women and delivers babies   |
| Obstetrics              | the study of pregnant women and childbirth  |
| Obstruction             | block, blockage   |
| Obstructive Sleep Apnea | breathing problems while sleeping because the airways collapse or get closed off                              |
| Obtain                  | get; determine  |
| Occlude                 | close off   |
| Occlusion               | closing; obstruction  |
| Occur(s)                | take(s) place   |
| Oculmycosis             | fungus infection in the eye   |
| Oculus Dexter (OD)      | right eye   |
| Oculus Sinister (OS)    | left eye  |
| Oculus Uterque (OU)     | each eye  |
| Oligomenorrhea          | occasional and irregular menstruation that occurs every 35 days to 6 months                                   |
| Oligospermia            | decreased amount of sperm in semen  |
| Oliguria                | decreased amount of urine   |
| Omphalitis              | inflammation of the belly button  |
| Omphalocele             | a birth defect in which there is bulging of the intestine through the<br>body wall in the belly button region |
| Oncogenic               | causing tumors to form  |
| Oncologist              | doctor who treats cancer  |
| Oncology                | the study of tumors or cancer   |
| One Tablespoon          | 3  teaspoons, 15cc = 15ml   |
| One Teaspoon            | 5cc = 5ml   |
| One-Time Donation       | only one sample will be obtained, no further test and/or specimens will be required                           |
| Onychectomy             | surgery to remove a nail  |
| Onychocryptosis         | ingrown nail  |
| Onychomalacia           | softening of the nails  |
| Onychomycosis           | fungal infection of the nail  |
| Onychophagia            | nail biting   |
| Oophorectomy            | surgery to remove the uterus and ovaries  |
| Oophoritis              | inflammation of the ovary   |
| Oophorohysterectomy     | surgery to remove the uterus and ovaries  |

| Open Label              | a medical research study in which subjects and researchers are told<br>which treatments the subjects are receiving, "unblinded" |
|-------------------------|---|
| Ophthalmic              | pertaining to the eye   |
| Opiates                 | morphine-like medications   |
| Opportunity             | chance  |
| Opthalmagia             | pain in the eye   |
| Opthalmic               | having to do with the eye   |
| Opthalmologist          | doctor who treats eye disorders   |
| Opthalmology            | the study of eye disorders  |
| Opthalmopathy           | disorder of the eye   |
| Opthalmorrhagia         | bleeding from the eye   |
| Optic                   | having to do with the eye   |
| Optic Nerve             | nerve that carries visual messages from the retina to the brain   |
| Optician                | person who makes glasses  |
| Optimal                 | best, most favorable or desirable   |
| Optometer               | tool used in eye examinations   |
| Optometry               | the study of the eye and vision   |
| Oral                    | having to do with the mouth   |
| Orally                  | taken by mouth; to be swallowed   |
| Orchidopexy             | surgery to tie down a testicle in the scrotum   |
| Orchiectomy             | surgery to remove one or both testicles   |
| Orchiepididymitis       | inflammation of a testicle and epididymis   |
| Orchiopexy              | surgery to tie down a testicle in the scrotum   |
| Orchioplasty            | surgery to fix a testicle   |
| Orchitis                | inflammation of a testicle  |
| Organ                   | two or more kinds of tissues that work together to make up a part of<br>the body with a unique function                         |
| Orgasm                  | the climax of sexual excitement   |
| Orthodontist            | dentist who treats teeth and jaw disorders  |
| Orthopedic              | pertaining to the bones   |
| Orthopedics             | the study of the bones and joints   |
| Orthopedist             | doctor who treats bone and joint disorders  |
| Orthopnea               | difficult breathing except when sitting up  |
| Orthostatic Hypotension | low blood pressure with change of position  |
| Orthotist               | person who puts on and teaches the use braces and splints   |
|                         |   |

|                         | disorder which is seen mostly in older persons, in which the joints   |
|-------------------------|---|
| Osteoarthritis (OA)     | disorder, which is seen mostly in older persons, in which the joints<br>become painful and stuff            |
| Osteoblasts             | cell that makes bone  |
| Osteocarcinoma          | bone cancer growth  |
| Osteochondritis         | inflammation of bone and cartilage  |
| Osteoclasis             | surgery to break a bone   |
| Osteocyte               | bone cell   |
| Osteofibroma            | benign tumor of bone and connective tissue  |
| Osteogenesis Imperfecta | genetic disorder in which the bones are delicate and break easily   |
| Osteomalacia            | soft bones  |
| Osteomyelitis           | infection and inflammation of bone  |
| Osteonecrosis           | death of bone tissue  |
| Osteopetrosis           | rare bone disorder characterized by dense bone.   |
| Osteoplasty             | surgery to fix a bone   |
| Osteoporosis            | loss of calcium from bone tissue resulting in bones that break<br>easily; prevalent in postmenopausal women |
| Osteosarcoma            | cancer of bone  |
| Otalgia                 | earache   |
| Otitis                  | inflammation of the ear   |
| Otitis Externa          | inflammation of the outer ear canal   |
| Otitis Interna          | inflammation of the inner ear   |
| Otitis Media            | inflammation of the middle ear  |
| Otologist               | doctor who treats disorders of the ear  |
| Otology                 | the study of the ear  |
| Otomastoiditis          | inflammation of the ear together with mastoiditis   |
| Otomycosis              | fungus infection in the outer ear canal   |
| Otopyorrhea             | discharge of pus from the ear   |
| Otorhinolaryngologist   | doctor who treats disorders of the ear, nose, and throat  |
| Otosclerosis            | bone deposits in the inner ear  |
| Otoscope                | tool used to look into the ear  |
| Ovaries                 | female sex glands   |
| Ovulation               | discharge of an egg from the ovary  |
| Ovum                    | the female sex cell that joins with the male sperm to make a zygote<br>and eventually a baby; egg           |
| Oximeter                | tool used to measure the amount of oxygen in the blood  |
| Oxytocin                | hormone made by the brain that makes the uterus cramp and milk come out of the breasts                      |

| Р                                 |   |
|-----------------------------------|---|
| Pachyderma                        | thickening of the skin  |
| Palate                            | roof of the mouth   |
| Palatitis                         | inflammation of the roof of the mouth   |
| Palatoplasty                      | surgery to fix the roof of the mouth  |
| Palliative Care                   | care intended to relieve pain   |
| Pallor                            | pale color of the skin  |
| Palmar                            | having to do with the palm of the hand  |
| Pancreas                          | organ that makes hormones, including insulin, and digestive juices  |
| Pancreatic                        | having to do with the pancreas  |
| Pancreatitis                      | inflammation of the pancreas  |
| Panplegia                         | total loss of muscle control and feeling  |
| Pansinusitus                      | inflammation of the all the sinuses on one side of the body   |
| Pap Test                          | microscope test used to detect virus infection of the cervix or<br>cancer of the vagina, cervix, or lining of the uterus            |
| Papule                            | pimple  |
| Para                              | woman who has given birth   |
| Parallel-Design                   | a medical research study comparing the response in two or more<br>groups of subjects receiving different interventions (treatments) |
| Paranasal Sinuses                 | air cavities inside the bones of the face around the nose   |
| Paranoia                          | psychiatric disorder involving extreme distrust and unreasonable<br>suspicion of other people and their motives                     |
| Paranoid                          | showing signs of paranoia   |
| Paraplegia                        | complete loss of muscle control and total loss of feeling from the waist downward   |
| Parasympatholytic                 | drug that blocks a kind of nerve  |
| Parasympathomimetic               | drug that imitates the action of a kind of nerve  |
| Parathyroid Gland                 | gland that makes and discharges a hormone that helps control the amount of calcium in the blood                                     |
| Parathyroidectomy                 | surgery to remove the parathyroid gland   |
| Parathyroidoma                    | growth or cancer on the parathyroid gland   |
| Paraysis                          | loss of ability to move muscles with loss of feeling also   |
| Parenteral                        | administration by injection   |
| Paresis                           | muscle weakness; partial paralysis  |
| Parietal Layer of the Pericardium | layer of tissue in the sack around the heart  |
| Parietal Layer                    | layer of tissue in the wall of a cavity   |

| Parkinson's Disease                  | a progressive disorder of the central nervous system, seen usually in older persons,<br>in which there is muscle weakness, trembling and sweating |
|--------------------------------------|---|
| Paronychia                           | inflammation around the nail  |
| Paroxysm                             | sudden worsening of an illness; or a spasm or seizure   |
| Partial Thromboplastin Time<br>(PTT) | a test of blood clotting time used to measure substances that help<br>the blood to clot   |
| Participant                          | person taking part  |
| Participate                          | take part   |
| Participation                        | taking part   |
| Parturition                          | childbirth  |
| Patch Test                           | allergy test performed by putting an allergy-causing material on the skin to see if it causes a reaction  |
| Patella                              | kneecap   |
| Patellectomy                         | surgery to remove the kneecap   |
| Patency                              | condition of being open   |
| Patent                               | open  |
| Pathogenesis                         | causative mechanism in a disease  |
| Pathogenic                           | causing disease   |
| Pathologist                          | doctor who studies the changes in the body and its tissues caused<br>by disease   |
| Pathology                            | the study of the changes in the body and body tissue caused by disease  |
| Pathology Samples                    | bone marrow and tissue samples  |
| Pediculosis                          | infection with lice, which are tiny bugs  |
| Pelvic Bone                          | hip bone  |
| Pelvic Cavity                        | space where the urinary bladder, certain reproductive organs, part<br>of the large intestine, and the rectum are found                            |
| Pelvic Inflammatory Disease<br>(PID) | infection of any of the female reproductive organs inside the pelvic space, including the uterus, uterine tubes, and ovaries                      |
| Pelvimetry                           | x-ray of the pelvis of the mother to make sure her pelvis is large<br>enough for the body to come through during birth                            |
| Pelvis of the Kidney                 | place where urine leaves the kidney   |
| Penicillin                           | type of antibiotic  |
| Penile Implant                       | artificial device put into the penis to help a man get an erection  |
| Penis                                | outer male sex organ  |
| Peptic Ulcer                         | sore in the stomach or in the lining of the stomach   |
| Per Os (PO)                          | by mouth  |
| Percussion                           | tapping of a body surface with the fingers to check the organs under<br>the skin by the sound that is made  |

| Percutaneous                | through the skin   |
|-----------------------------|--|
| Percutaneous                | through the skin   |
| Percutaneous Transluminal   | procedure in which a small balloon is blown up inside the blood  |
| Coronary Angioplasty (PTCA) | vessel to open up a blood vessel   |
| Perforation                 | making a hole  |
| Performance Status          | ability to do activities   |
| Pericardiotomy              | surgery to make an opening into the pericardium  |
| Pericarditis                | inflammation of the pericardium  |
| Pericardium                 | two-layer sack of tissue around the heart  |
| Perimetritis                | inflammation of the perimetrium  |
| Perimetrium                 | outer layer of tissue around the uterus  |
| Perineorrhaphy              | stitching a tear in the perineum   |
| Perineum                    | area between the vulva and rectum in women and between the scrotum and rectum in men   |
| Periosteum                  | layer of tissue that covers bone   |
| Peripheral                  | not central  |
| Pertussis                   | whooping cough   |
| Petechia                    | tiny red or purple spot on skin or other tissue caused by bleeding   |
| Phacoemulsification         | method of removing a cataract by using sound waves to break it up  |
| Phalanges                   | finger and toe bones   |
| Pharmacist                  | person licensed to prepare and dispense drugs and fill prescriptions   |
| Pharmacodynamics            | the study of how drugs act on the body   |
| Pharmacokinetics            | the study of the way a drug enters and leaves the blood and tissues over time  |
| Pharyngitis                 | sore throat  |
| Pharynx                     | area between the mouth and esophagus that performs the swallowing action; throat   |
| Phase I                     | a medical research study using healthy volunteers; initial safety testing of a new drug  |
| Phase II                    | a later clinical study looking at a new drug's dosage, safety, and efficacy in patients  |
| Phase III                   | a still later controlled, randomized study testing a specific dose of a<br>new drug and its effectiveness in treating a condition or disease             |
| Phase IV                    | after a drug has been approved by the FDA and is available for use;<br>a study that looks at how well the drug is being used in the medical<br>community |
| Phenothiazines              | group of drugs used for the control of mental illness  |
| Phenylketonuria (PKU)       | dangerous build-up of toxic materials in the body resulting from a genetic defect that affects metabolism  |

| Phlebitis            | irritation or inflammation of the vein   |
|----------------------|--|
| Phlebography         | x-ray of a vein or veins using a dye to outline them   |
| Phlebotomy           | putting a needle into a vein to remove blood   |
| Phlectomy            | surgery to remove part or all of a vein  |
| Phonocardiogram      | detailed record of heart sounds  |
| Photophobia          | irritation of the eye caused by light  |
| Photoretinitis       | inflammation of the back of the eye caused by strong light   |
| Phrenic              | having to do with the mind; or having to do with a diaphragm   |
| Phrenopathy          | mental disorder  |
| Pia Mater            | inner layer of the meninges  |
| Pinna                | outer flap of the ear  |
| Pituitary Gland      | gland that sits under the brain and makes many hormones,<br>including some that control other glands   |
| Placebo              | an inactive substance; a pretend treatment (with no drug in it) that<br>is compared in a clinical trial with a drug to test if the drug has a<br>real effect |
| Placebo Effect       | phenomenon of improvement seen with the use of a placebo   |
| Placenta             | tissues that provide food for the unborn baby  |
| Plantar              | having to do with the sole of the foot   |
| Plasma               | liquid part of blood where cells float   |
| Plasmapheresis       | removing plasma from blood that has been drawn from a person   |
| Platelet Count       | the number of platelets in the blood   |
| Platelets            | cells that help the blood clot; a decrease can lead to bleeding  |
| Pleura               | thin tissue that covers the lungs and inner walls of the chest   |
| Pleural Effusion     | fluid in the chest cavity  |
| Pleurisy             | inflammation of the pleura with discharge in the chest cavity,<br>making breathing painful   |
| Pleuropexy           | surgery to fix the film that covers the lungs  |
| Pneumatocele         | bulging of the lungs through an abnormal opening   |
| Pneumobronchotomy    | incision into the lungs  |
| Pneumoconiosis       | dust in the lungs  |
| Pneumocystis Carinii | type of parasite or fungus that causes pneumonia in infants and<br>weakened patients, such as those with AIDS  |
| Pneumonectomy        | surgery to remove a lung   |
| Pneumonia            | inflammation of the lungs in which the lungs become heavy  |
| Pneumonitis          | inflammation of the lungs  |
| Pneumothorax         | free air in the chest cavity   |
| Podiatrist           | foot doctor  |

| Poliomyelitis                         | infection with a virus in which there can be fever, headache, and<br>stiff neck followed by paralysis and wasting away of muscles |
|---------------------------------------|---|
| Polyarteritis                         | inflammation of many arteries   |
| Polycystic Kidney                     | kidney with many cysts in it  |
| Polydipsia                            | too much thirst   |
| Polymyositis                          | inflammation of more than one muscle  |
| Polyneuritis                          | inflammation of several nerves  |
| Polyp                                 | type of growth that sticks up out of tissue   |
| Polypectomy                           | surgery to remove a polyp   |
| Polyuria                              | too much urine being made   |
| Pons                                  | part of the brain through which the two sides and different areas of<br>the brain communicate                                     |
| Porphyria                             | disturbance of metabolism that can be seen as disorders of the skin<br>or other organs  |
| Positron Emission Tomography<br>(PET) | imaging scanner for determining cancer, heart disease, and brain disorders  |
| Post                                  | after   |
| Posterior                             | having to do with the back of the body  |
| Posterior Lobe Of The Pituitary       | part of the pituitary gland that discharges oxytocin, vasopressin, and some proteins  |
| Postherpetic Neuralgia                | pain lasting after condition has healed   |
| Postictal                             | happening after a seizure   |
| Postpartum                            | after childbirth  |
| Potential                             | possible  |
| Potentially                           | could be; possibly  |
| Potentiate                            | increase or multiply the effect of a drug or toxin by administration<br>of another drug or toxin at the same time                 |
| Potentiation                          | increase in drug action from using two drugs together instead of<br>using each drug alone   |
| Potentiator                           | an agent that helps another agent work better   |
| Pre                                   | before  |
| Preeclampsia                          | serious problem of pregnancy in which there is high blood pressure<br>and excess fluid in the tissues of the mother               |
| Pregnant/Pregnancy                    | carrying an unborn baby   |
| Preictal                              | happening before a seizure  |
| Premature Infant                      | infant born before it has fully developed; weight less than 5.5 lbs   |
| Prenatal                              | before birth  |
| Prepuce                               | fold of skin (foreskin) that covers the penis and is removed in circumcision  |

| Presbycusis                     | loss of hearing because of old age  |
|---------------------------------|---|
| Presbyopia                      | problems with vision because of old age   |
| Previous                        | other; done before  |
| Primigravida                    | woman going through her first pregnancy   |
| Primipara                       | woman who has had one pregnancy that lasted at least 20 weeks                                       |
| Principal Investigator (PI)     | the main individual who is responsible and accountable for<br>conducting a medical research study   |
| Prior                           | before  |
| Proctologist                    | doctor who treats disorders of the rectum and anus  |
| Proctology                      | the study of the disorders of the rectum and anus   |
| Proctoptosis                    | fallen anus protruding from the body  |
| Proctoscope                     | tool used to look into the rectum   |
| Progestins                      | type of female hormones that prepare the uterus for pregnancy                                       |
| Prognosis                       | outlook, probable outcomes  |
| Prolapsed Uterus                | fallen uterus protruding from the body  |
| Prone                           | lying face down   |
| Prophylaxis                     | a drug given to prevent disease or infection  |
| Prospective Study               | study following patients forward in time  |
| Prostate Gland                  | gland that makes fluid that aids movement of sperm  |
| Prostatectomy                   | surgery to remove all or part of the prostate gland   |
| Prostate-Specific Antigen (PSA) | substance in blood that is measured to check for prostate cancer                                    |
| Prostatitis                     | inflammation of the prostate gland  |
| Prostatocystitis                | inflammation of the neck of the bladder and the bladder   |
| Prostatolith                    | stone in the prostate gland   |
| Prostatorrhea                   | discharge of liquid from the prostate   |
| Prosthesis                      | artificial body part  |
| Protein                         | a complex natural substance essential to the structure and function of all living cells and viruses |
| Prothrombin Time (PT)           | a test of blood clotting time used to measure substances that help<br>the blood to clot             |
| Protocol                        | plan of study   |
| Proximal                        | closer to the center of the body, away from the end   |
| Proximal                        | nearest   |
| Pruritus                        | itchiness   |
| Pseudocyesis                    | false pregnancy   |
| Psoriasis                       | scaly skin rash   |
| Psychiatry                      | the study of mental disorders   |

Adapted from: https://www.feinsteininstitute.org/wp-content/uploads/2013/02/Glossary-of-Lay-Terminology 12-15-14.pdf

| Psychogenic                       | caused by the mind (rather than the body)   |
|-----------------------------------|---|
| Psychologist                      | doctor who treats disorders of the mind, thoughts, and behavior                     |
| Psychology                        | the study of mental action and behavior   |
| Psychopathy                       | any disorder of the mind  |
| Psychosis                         | abnormal thinking and/or hallucinations   |
| Psychosomatic                     | having a connection between the mind and physical symptoms                          |
| Pterygium                         | unusual fold of film on the eye   |
| Puberty                           | years when the sex organs mature  |
| Puerpera                          | a woman who has just given birth to an infant                                       |
| Puerperal                         | right after childbirth  |
| Puerperium                        | the first 3 to 6 weeks after childbirth   |
| Pulmonary                         | having to do with the lungs   |
| Pulmonary Edema                   | fluid in the lungs  |
| Pulmonary Embolism                | blood clot in the lungs   |
| Pulmonary Function Testing        | breathing tests   |
| Pulmonary Neoplasm                | lung tumor  |
| Pupil                             | black spot in the middle of the eye, which is the opening in the center of the iris |
| Pupillometer                      | tool that measures how wide the pupil is  |
| Purgative                         | drug used to cause the bowels to empty  |
| Purified Protein Derivative (PPD) | substance used in tuberculosis skin test  |
| Purpura                           | small purple-red marks in skin or other tissue caused by bleeding                   |
| Pustule                           | pimple filled with pus  |
| Pyelitis                          | inflammation of the kidney and its pelvis   |
| Pyelogram                         | x-ray of the kidney and ureters   |
| Pyelolithotomy                    | surgery to remove a kidney stone  |
| Pyelonephritis                    | inflammation of the kidney and its pelvis   |
| Pyeloplasty                       | surgery to fix the pelvis of the kidney   |
| Pyelostomy                        | surgery to make an opening into the pelvis of the kidney                            |
| Pyloric Sphincter                 | ring of muscles between the stomach and the small intestine                         |
| Pyloromyotomy                     | surgery to cut muscles of a pyloric sphincter that is too narrow                    |
| Pyloroplasty                      | surgery to fix the pyloric sphincter  |
| Pylorus                           | the opening of the stomach into the small intestine                                 |
| Pyosalpinx                        | pus in the uterine tubes  |
| Pyuria                            | pus in the urine  |

Г

| Q                         |  |
|---------------------------|--|
| Quadriplegia              | loss of muscle movement and loss of feeling in both arms and legs  |
| R                         |  |
| Rachiotomy                | surgery to cut into a bone or bones of the spine   |
| Rachischisis.             | birth defect in which there is a groove in the spine   |
| Radial Keratotomy         | surgery to fix nearsightedness   |
| Radiation Therapy         | x-ray or cobalt treatment  |
| Radiculitis               | inflammation of a spinal nerve root  |
| Radioimmunoassay (RIA)    | laboratory method to measure a substance, such as a hormone  |
| Radiological Studies      | Gamma and CT scans   |
| Radius                    | one of the two lower arm bones   |
| Random                    | by chance  |
| Randomization             | chance selection   |
| Randomized                | like the flip of a coin; 50/50 chance of receiving a study medicine<br>or treatment                          |
| Rationale                 | reason(ing)  |
| Recombinant               | formation of new combinations of genes   |
| Reconstitution            | putting back together the original parts or elements   |
| Rectal Administration     | giving a substance by putting it into the rectum   |
| Rectocele                 | bulging of the rectum into the vagina  |
| Rectouterine Pouch        | pouch in the area between the uterus and the rectum  |
| Recur                     | happen again   |
| Red Blood Cell (RBC)      | a cell in the blood that carries oxygen; a decrease can lead to<br>shortness of breath, weakness and fatigue |
| Red Blood Cell Count      | the number of red blood cells in the blood   |
| Red Blood Cell Morphology | the size and shape of individual red blood cells as seen under a microscope                                  |
| Reflux                    | upward movement  |
| Refractory                | not responding to treatment  |
| Refrain                   | avoid doing  |
| Regarding:                | about  |
| Regeneration              | regrowth of a structure or of lost tissue  |
| Regimen                   | pattern of giving treatment  |
| Relapse                   | the return of a medical problem  |

| Remission                | when a medical problem gets better or goes away at least for a while  |
|--------------------------|---|
| Remote                   | slight  |
| Renal                    | pertaining to the kidneys   |
| Renal                    | having to do with the kidney  |
| Renal Biopsy             | removing a piece of kidney tissue to look at it under a microscope  |
| Renal Calculi            | kidney stones   |
| Renal Pelvis             | place where urine leaves the kidney   |
| Renal Transplant         | kidney transplant   |
| Renogram                 | x-ray to check kidney function by measuring how fast a dye passes<br>through the kidneys and to the urinary bladder         |
| Replicable               | possible to duplicate   |
| Reproduction             | making babies   |
| Reproductive             | having to do with reproduction  |
| Research Study           | a process of collecting information about a specific question in<br>order to find an answer                                 |
| Research Subject(s)      | a volunteer(s) taking part in a medical research study  |
| Resect                   | remove or cut out surgically  |
| Resectoscope             | tool used to remove or biopsy tissue from the urinary bladder, prostate, or urethra   |
| Retina                   | innermost layer of the eye  |
| Retinal                  | having to do with the retina  |
| Retinal Photocoagulation | use of a laser light to treat disorders of the retina or tumors in the eye  |
| Retinitis Pigmentosa     | eye disorder in which the retina atrophies and vision gradually worsens   |
| Retinoblastoma           | cancer in the eye growing off of the retina   |
| Retractor                | tool used for holding back tissue   |
| Retrograde Pyelogram     | x-ray of the kidney and ureter made by injecting dye backward into<br>the ureter  |
| Retrospective Study      | study looking back over past experience   |
| Reye's Syndrome          | serious disorder of children, which often occurs after a viral infection, affecting the brain, liver, and other body organs |
| Rhabdomyoma              | benign tumor of a muscle  |
| Rhadomyosarcoma          | cancer of a muscle  |
| Rheumatic Fever          | bacterial disease in which there is fever and inflammation of the<br>heart, blood vessels, and joints                       |
| Rheumatic Heart Disease  | damage to the heart caused by rheumatic fever, especially deformed heart valves   |

|                        | substance in blood that is measured to check for rheumatoid  |
|------------------------|--|
| Rheumatoid Factor      | arthritis  |
| Rhinitis               | runny nose   |
| Rhinomycosis           | fungus infection in the nose   |
| Rhinoplasty            | surgery to fix the nose  |
| Rhinorrhagia           | nosebleed  |
| Rhinorrhea             | runny nose   |
| Rhizotomy              | surgery to cut apart a nerve root  |
| Rhytidectomy           | surgery to remove wrinkles   |
| Rhytidoplasty          | surgery to remove wrinkles from the face   |
| Ribonucleic Acid (RNA) | genetic material in the body that serve as blueprints for making proteins  |
| Risk                   | a possibility of injury or harm  |
| Risk Factor            | a characteristic or actions of an individual which identify them as<br>having a high likelihood of developing a specific disease or<br>condition |
| Rongeur                | tool used for cutting hard tissue, such as bone  |
| S Sacrum               | large triangle-shaped bone at the bottom of the spine just above the tailbone  |
| Sagittal Plane         | divides the body into a right and left side  |
| Saliva                 | liquid in the mouth that helps with swallowing food; spit  |
| Salivary Glands        | glands that make saliva  |
| Salphinx               | tube down which the egg travels from the ovary to the uterus   |
| Salpingectomy          | surgery to remove the uterine tube   |
| Salpingitis            | inflammation of the uterine tubes  |
| Salpingocele           | uterine tube bulging out of an abnormal opening  |
| Salpingocyesis         | pregnancy growing in the uterine tube  |
| Salpingo-Oophorectomy  | surgery to remove an ovary and uterine tube  |
| Salpingostomy          | surgery to make an opening into or to open a blockage of a uterine tube  |
| Sarcoma                | cancer of connective tissue cells  |
| Satisfactorily         | (good) enough  |
|                        | itaby akin infaction by a microscopic by a called a mita manage  |
| Scabies                | itchy skin infection by a microscopic bug called a mite; mange   |
| Scabies<br>Scapule     | shoulder blade   |

| Schizoaffective     | a mixed psychiatric disorder relating to a complex psychotic state that has<br>features of both schizophrenia and a mood disorder such as bipolar<br>disorder     |
|---------------------|---|
| Schizophrenia       | psychiatric disorder with symptoms of emotional instability,<br>detachment from reality, often with delusions and hallucinations, and<br>withdrawal into the self |
| Schizophrenic       | relating to schizophrenia or resulting from schizophrenia   |
| Sciatica            | pain running down from the lower back to the buttocks to the back<br>or side of the leg   |
| Sclera              | outer protective layer of the eye; "whites of the eyes"   |
| Scleral Buckling    | surgery to fix a detached retina  |
| Scleroderma         | hardening and thickening of the skin  |
| Sclerokeratitis     | inflammation of the sclera and the cornea   |
| Scleromalacia       | softening of the sclera seen in patients with rheumatoid arthritis  |
| Sclerotomy          | surgery to cut into the sclera  |
| Scoliosis           | S-shaped (side-to-side) curve of the spine  |
| Scratch Test        | allergy test performed by putting a small amount of allergy-causing material on small skin patches to see if it causes a reaction                                 |
| Screening           | the process of deciding if someone is qualified to take part in a<br>medical research study or not  |
| Scrotum             | pouch that holds the testicles  |
| Sebaceous Gland     | gland that discharges oil into the skin   |
| Seborrhea           | very oily skin  |
| Sedation            | calming effect  |
| Sedative            | a medication to calm or make less anxious   |
| Seizure             | sudden, uncontrolled muscle spasms and loss of consciousness resulting from abnormal brain function   |
| Self-Retaining      | stays in place without being held   |
| Semen               | fluid containing, sperm, which is discharged from the penis during<br>the climax of sexual intercourse  |
| Semen Analysis      | test used to count and examine the sperm cells  |
| Semicircular Canals | channels in the labyrinth of the ear  |
| Semilunar Valves    | valves that control the flow of blood out of the heart by opening<br>and closing with each heart beat   |
| Seminoma            | a type of testes cancer   |
| Sepsis              | blood infection   |
| Septoplasty         | surgery to fix the wall inside the nose   |
| Septotomy           | incision into the wall inside the nose  |
| Sequentially        | in a row  |

| Serrations                         | small grooves in the edges or tips of tools that help to hold tissue  |
|------------------------------------|---|
| Serum                              | clear liquid part of blood  |
| Serum Bilirubin                    | blood test used to detect liver disorder  |
| Serum Calcium                      | blood test used to find out how much calcium is in the blood  |
| Serum Creatine Kinase              | blood test used to measure creatine   |
| Serum Enzyme Test                  | blood test used to detect the presence of certain chemicals<br>discharges into the blood from dying heart muscle                                  |
| Serum Phosphorus                   | blood test used to measure the amount of phosphorus present   |
| Serum Test                         | blood test used to measure the amount of endocrine material in the blood  |
| Severe                             | very serious, life threatening  |
| Sexually Transmitted Disease (STD) | disorder spread by sexual contact   |
| Shingles                           | painful, fluid-filled blisters caused by herpes virus infection   |
| Shunt                              | artificial or natural channel running between two other channels  |
| Sialolith                          | stone in a salivary gland or duct   |
| Sickle Cell Anemia                 | genetic defect of hemoglobin causing red blood cells to change<br>shape; symptoms include pain in the joints and belly, and ulcers on<br>the legs |
| Side Effects                       | unwanted or unintended problems with a drug or treatment  |
| Sigmoid Colon                      | the lower part of the colon just before the rectum  |
| Sigmoidoscope                      | tool used to look into the sigmoid colon  |
| Single Blind(ed)                   | a medical research study in which the person giving the treatment,<br>but not the patient, knows which treatment the patient is receiving         |
| Single Dose                        | getting one dose of medicine  |
| Sinusotomy                         | incision into the sinus   |
| Site (of investigation)            | the place where the medical research study will be carried out  |
| Sleep Apnea                        | breathing problems while sleeping   |
| Slipped Disk                       | bulging out of a pad between bones of the spine, which often<br>causes pinched nerve roots  |
| Small Intestine                    | the bowel between the stomach and the large intestine, including<br>the duodenum, jejunum, and ileum  |
| Snare                              | tool with a wire loop used for removing tissue growth   |
| Social History                     | exercise, smoking, weight gain, recreational drugs, sexual activity, family education, income and employment                                      |
| Sodium                             | salt  |
| Somatic                            | having to do with the body  |
| Somatogenic                        | caused by the body (rather than the mind)   |
| Somatopathy                        | disorder of the body as opposed to the mind   |

| Somnolence                 | sleepiness   |
|----------------------------|--|
| Spasm                      | a muscle contraction that produces pain and interferes with use of<br>the muscle                                   |
| Specific Gravity           | test used to measure the amount of solid material and minerals in a liquid, such as the urine                      |
| Speculum                   | tools used to stretch and hold open an opening into a body channel, such as the nose or vagina                     |
| Sperm                      | the male sex cell that joins with a female egg to make a zygote and eventually a baby                              |
| Sphygmocardiograph         | tool used to record arterial blood pressure  |
| Sphygmomanometer           | tool for measuring blood pressure  |
| Spina Bifida               | birth defect in which the spine does not develop fully and close up  |
| Spinal Cavity              | space inside the spinal column where the spinal cord is found  |
| Spinal Cord                | the cord of nerve cells and nerve fibers running down the spine that<br>helps guide messages to and from the brain |
| Spirometer                 | an instrument to measure the amount of air taken into and exhaled from the lungs                                   |
| Spirometer                 | tool used to measure the amount of air going into and out of the<br>lungs during breathing                         |
| Spleen                     | largest lymph organ in the body  |
| Splenectomy                | surgery to remove the spleen   |
| Splenomegaly               | enlarged spleen  |
| Splenopexy                 | surgery to tie down the spleen   |
| Spondylosyndesis           | fusion of the spine  |
| Sponsor                    | the company, department, or person who is paying for the medical research study                                    |
| Sputum                     | fluid and material brought up from the lungs and windpipe and spit<br>out through the mouth                        |
| Squamous Cell Carcinoma    | cancer that usually occurs on the skin or in the lungs   |
| Staging                    | a determination of the extent of the disease   |
| Standard Of Care           | common management of disease, condition  |
| Staphylococcus             | type of bacteria   |
| Stenosis                   | narrowing of a duct, tube, or one of the valves in the heart   |
| Stenosis                   | narrowing of a channel   |
| Stereotactic Breast Biopsy | biopsy of breast tissue taken by using a three-dimensional body<br>map to locate the tissue                        |
| Sterility                  | Inability to have children   |
| Sterilization              | the killing of all living germs; or a process to make a man or<br>woman not able to have children                  |
| Sternoclavicular           | having to do with the breastbone and the collarbone  |

| Sternoid  | like the breastbone  |
|---|--|
| Sternum   | breastbone   |
| Stethoscope   | tool used to listen to the sounds made by the heart, lungs, intestines, and other organs         |
| Stevens-Johnson Syndrome Or<br>Toxic Epidermal Necrolysis | Potentially life threatening skin rash   |
| Stimulant   | drug used to speed up the central nervous system   |
| Stomach   | the first part of the intestines that holds food for digestion after it is swallowed             |
| Stomatitis  | mouth sores, inflammation of the mouth   |
| Stomatogastric  | the mouth and stomach  |
| Stool   | bowel movement; feces  |
| Stool Culture   | test for bacteria in stool   |
| Strabismus  | abnormal position of the eye, as in wall eye or crossed eyes                                     |
| Stratify  | arrange in groups for analysis of results (e.g., stratify by age, sex, etc.)                     |
| Streptocoocus   | type of bacteria   |
| Streptomycin  | type of antibiotic   |
| Stricture   | area where a tube in the body is too narrow  |
| Study Phase   | how far along the medical research study is  |
| Stupor  | stunned state in which it is difficult to get a response or the attention of the subject         |
| Stye  | pimple on the eyelid   |
| Subclavian  | under the collarbone   |
| Subcostal   | below the ribs   |
| Subcutaneous  | under the skin   |
| Subcutaneous Injection                                    | injected under the skin by way of a needle   |
| Subdural  | below the outer layer of the meniges   |
| Sublingual  | under the tongue   |
| Sublingual Administration                                 | giving a substance by placing it under the tongue (not to be<br>swallowed) (e.g., nitroglycerin) |
| Submandibular   | below the lower jaw  |
| Submaxillary  | below the upper jaw  |
| Subscapular   | below the shoulder blade   |
| Sulfonamide   | type of antibiotic   |
| Superficial   | close to the outside of the body   |
| Superior  | toward the top of the body   |
| Supine  | lying on the back  |

| Supportive Care                    | general medical care aimed at symptoms, not intended to improve<br>or cure underlying disease  |
|------------------------------------|--|
| Suppository                        | drug that is given by putting it into the rectum, vagina, or urethra   |
| Suprarenal                         | above the kidney; or having to do with the adrenal gland   |
| Suprascapular                      | above the shoulder blade   |
| Sutured                            | stitched   |
| Sweat Glands                       | structures in and under the skin that makes sweat  |
| Swimmer's Ear                      | inflammation of the outer ear canal  |
| Sympatholytic                      | drug used to slow down the action of certain types of nerves   |
| Sympathomimetic                    | drug used to speed up heart rate, raise blood pressure, and open up air passages   |
| Symphysis                          | type of joint where two bones meet but there is no movement  |
| Symptomatic                        | having symptoms  |
| Symptoms                           | medical problems which are noticed by a patient  |
| Syncope                            | fainting spell   |
| Syndrome                           | set of signs that happen at the same time in the body  |
| Synergism                          | combined action of two drugs used together that is better than using each drug alone   |
| Synoviosarcoma                     | cancer of the joint  |
| Synthesized                        | man-made   |
| Syphilis                           | bacterial infection spread by sexual contact   |
| System                             | having to do with the whole body   |
| Systemic Lupus Erythematosus (SLE) | chronic disorder of connective tissue in which there can be skin<br>rash, arthritis, kidney problems, and anemia, among other problems |
| Systole                            | the time when the heart contracts to pump blood to the body  |
| Systolic                           | top number in blood pressure, pressure during active contraction of the heart  |

| Tachypnea     | fast breathing                                   |
|---------------|--|
| Tarsal Bones  | ankle bones                                      |
| Tarsectomy    | surgery to remove one or more of the ankle bones |
| Temperature   | how warm or cold a patient's body is             |
| Tendinitis    | inflammation of tendons                          |
| Tendon        | elastic band that attaches muscle at each end    |
| Tenodynia     | pain in a tendon                                 |
| Tenomyoplasty | surgery to stitch together a ripped tendon       |

| Tenorrhaphy                          | surgery to fix a tendon and muscle  |
|--------------------------------------|---|
| Tenosynovitis                        | inflammation of covering layer around a tendon  |
| Tenotomy                             | surgery to cut tendon of an eye muscle to fix strabismus  |
| Teratogenic                          | capable of causing malformations in fetuses   |
| Testes                               | male sex glands   |
| Testicle/Testis                      | one of two male sex glands that make sperm  |
| Testicular Carcinoma                 | cancer of the testicles   |
| Tetany                               | muscle cramps caused by a low amount of calcium   |
| Tetracycline                         | type of antibiotic  |
| Tetraplegia                          | total loss of muscle movement and loss of feeling in both arms and legs                             |
| Therapy                              | medicine or medical care given to a patient for a disease or condition                              |
| Thoracalgia                          | pain in the chest or wall of the chest  |
| Thoracentesis                        | using a needle to remove fluid from the chest cavity  |
| Thoracic Cavity                      | space where the heart, lungs, esophagus, trachea, bronchi, and thymus are found                     |
| Thoracic Vertebrae                   | bones of the spine in back of the chest   |
| Thoracoscope                         | tool used to look into the chest cavity   |
| Thoracotomy                          | surgery to cut into the chest   |
| Thorax                               | the chest   |
| Thorough                             | complete, good  |
| Throat                               | area between the mouth and esophagus that performs the swallowing action                            |
| Thrombosis                           | blood clotting  |
| Thrombus                             | a clotting of blood factors that frequently blocks blood flow                                       |
| Thymectomy                           | surgery to remove the thymus  |
| Thymoma                              | tumor of the thymus   |
| Thymus                               | lymph organ in the chest, which is most active at puberty, where a type of lymphocyte is made       |
| Thyroid Gland                        | gland in the neck that makes the thyroid hormones, which are<br>important in controlling metabolism |
| Thyroidectomy                        | surgery to remove the thyroid gland   |
| Thyroid-Stimulating Hormone<br>(TSH) | hormone that makes the thyroid gland active   |
| Thyroparathyroidectomy               | surgery to remove the thyroid and parathyroid glands  |
| Thyrotoxicosis                       | disorder caused by too much thyroid hormone   |
| Tibia                                | the larger of the two lower leg bones; the shin bone  |

Adapted from: https://www.feinsteininstitute.org/wp-content/uploads/2013/02/Glossary-of-Lay-Terminology 12-15-14.pdf

| Tinea                           | fungal infection of skin; ringworm   |
|---------------------------------|--|
| Tinnitus                        | ringing, roaring, buzzing, or clicking noises in the ears  |
| Tissue                          | group of cells that work together  |
| Titration                       | slow increase in drug dosage, guided by patient's responses  |
| T-Lymphocytes                   | type of white blood cells  |
| Tolerability                    | how well a patient can stand a particular medicine or treatment;<br>ability to be used   |
| Tolerance                       | decrease in response to a fixed dosage of drug; over time, higher<br>and higher doses of a drug are needed to get desired effect |
| Tonometer                       | tool that measures pressure inside the eye   |
| Tonsil                          | lymphoid tissue in the back of the mouth   |
| Tonsillectomy                   | surgery to remove a tonsil or tonsils  |
| Topical                         | applied to skin; surface   |
| Topical Anesthetic              | applied to a certain area of the skin and reducing pain only in the area to which applied  |
| Topical Application             | giving a medication by putting it directly on the skin   |
| Toxicity                        | any harmful effect of a drug or poison   |
| Trabeculectomy                  | surgery that makes a place for fluid to drain from the eye, reducing<br>eye pressure in patients with glaucoma                   |
| Trachea                         | windpipe   |
| Tracheitis                      | inflammation of the windpipe   |
| Tracheocystitis                 | inflammation of the neck of the urinary bladder  |
| Tracheoplasty                   | surgery to fix the windpipe  |
| Tracheostomy                    | surgery to make a hole through the neck from the windpipe to the outside of the body   |
| Tranquilizer                    | drug used to control anxiety   |
| Transdermal                     | through the skin   |
| Transdermal Patch               | patch containing a drug that is put on the skin so the drug will enter<br>the body through the skin                              |
| Transient Ischemic Attack (TIA) | sudden loss of blood flow to the brain that lasts for a few minutes to<br>an hour but has no lasting effect                      |
| Transiently                     | temporarily  |
| Transrectal Ultrasound          | ultrasonography of the organs in the belly done using a probe in the rectum  |
| Transverse Plane                | divides the body to make a top and bottom  |
| Trauma                          | injury; wound  |
| Traumatic                       | causing damage, like a toll used to crush tissue   |
| Treadmill Stress Test           | test using a walking machine to determine heart function   |

| Treatment                          | medicine or medical care given to a patient   |
|------------------------------------|---|
| Trichomoniasis                     | parasite infection that is spread by sexual contact   |
| Trichomycosis                      | fungus infection in the hair  |
| Tricupsid Valve                    | a valve in the heart that controls the flow of blood by opening and closing with each heart beat  |
| Tubal Ligation                     | surgery to close the uterine tubes to prevent pregnancy   |
| Tuberculin                         | substance used in skin tests to test for tuberculosis   |
| Tuberculosis                       | bacterial infection that usually results in a serious lung disorder   |
| Tumor                              | a mass in a specific area   |
| Tumor Lysis Syndrome               | occurs when many cancer cells are killed quickly, the intracellular<br>contents (inside these cells) pour into the blood stream which<br>causes an imbalance in the normal chemistry of the blood |
| Tympanic Membrane                  | eardrum   |
| Tympanitis                         | inflammation of the ear drum  |
| Tympanometer                       | tool used to fix the ear drum   |
| Tympanoplasty                      | surgery to fix the eardrum and bones of the middle ear  |
| U                                  |   |
| Ulcer                              | sore  |
| Ulcerative Colitis                 | sores in the colon  |
| Ulna                               | one of the two lower arm bones  |
| Ultrasonography                    | a machine that makes a picture of internal organs by bouncing<br>sound waves off them and recording the echoes  |
| Ultrasonography                    | making a picture of internal organs by bouncing sound waves off<br>them and recording the echoes  |
| Ultrasound                         | making a picture of internal organs by bouncing sound waves off<br>them and recording the echoes  |
| Umbilical Region                   | area around the naval   |
| Umbilicus                          | navel; belly button   |
| Unconscious                        | not awake and not aware; knocked out  |
| Ungual                             | having to do with the nails   |
| Unilateral                         | having to do with only one side of a structure  |
| Upper GI (Gastrointestinal) Series | x-ray using a dye to show the upper part of the digestive system  |
| Upper Respiratory Infection (URI)  | lung infection  |
| Upper Respiratory Infection (URI)  | a cold or flu   |
| Uptake                             | absorption and incorporation of a substance by living tissue, absorb<br>and incorporate a substance, taking in of a substance by living<br>tissue   |

| Uremia                        | build-up of poisons in the blood, usually because of kidney failure   |
|-------------------------------|---|
| Ureter                        | tube that carries urine from a kidney to the urinary bladder  |
| Ureterectomy                  | surgery to remove all or part of a ureter   |
| Ureteritis                    | inflammation of the ureter  |
| Ureterocele                   | bulging of a ureter taken after putting a dye in it to outline it   |
| Ureterogram                   | x-ray of a ureter taken after putting a dye in it to outline it   |
| Ureterolithiasis              | stones in the ureter  |
| Ureterostenosis               | narrow area in a ureter   |
| Ureterostomy                  | surgery to make an opening into a ureter  |
| Ureterotomy                   | surgery to cut into a ureter  |
| Urethra                       | tube that carries urine from the urinary bladder to the outside of the body   |
| Urethritis                    | inflammation of the urethra   |
| Urethrocystitis               | inflammation of the urethra   |
| Urethrometer                  | tool used to measure the urethra  |
| Urethropexy                   | surgery to tie down the urethra   |
| Urethroplasty                 | surgery to fix the urethra  |
| Urethrostomy                  | surgery to make an opening from the urethra to the outside of the body  |
| Uric Acid Test                | blood test used to measure the amount of uric acid in the blood   |
| Urinal                        | container that holds urine  |
| Urinalysis                    | series of tests done on urine   |
| Urinary                       | having to do with urine   |
| Urinary Bladder               | sack that holds urine before it leaves the body   |
| Urinary Catheterization       | passing a tube into the urinary bladder to remove urine   |
| Urinary Retention             | abnormal holding of urine   |
| Urinary Suppression           | not able to discharge urine   |
| Urinary Tract                 | all the structures that make and pass urine, including the kidneys, ureters, urinary bladder, and urethra                       |
| Urinary Tract Infection (UTI) | bladder infection   |
| Urination                     | the act of passing urine  |
| Urine                         | pale yellow liquid waste material and sediment  |
| Urine Casts And Crystals      | urine test to check mineral levels and sediment in the urine and to<br>check for infection or inflammation in the urinary tract |
| Urine Color                   | normal color for urine is straw yellow  |
| Urine Ph                      | urine test to find out the chemical make-up of urine (acidity)  |
| Urine Protein                 | urine test used to measure how much protein is in the urine   |

| Urinometer            | tool used to measure the specific gravity of urine  |
|-----------------------|---|
| Urodynamics           | the force and flow of urine   |
| Urologist             | doctor who treats disorders of the urinary tract of men and women<br>and the genital tract of men                           |
| Urticaria             | hives   |
| Uterus                | organ where the unborn baby develops and grows  |
| Utilize               | use   |
| Uvula                 | v-shaped tissue that hangs from the roof of the back of the mouth   |
| Uvulectomy            | surgery to remove the uvula   |
| Uvulitis              | inflammation of the uvula   |
| V                     |   |
| Vagina                | tube that connects the uterus to the outside of the body  |
| Vaginitis             | inflammation of the vagina  |
| Vaginodynia           | pain in the vagina  |
| Vaginoperineorrhgaphy | surgery to fix tears in the vagina and vaginal areas  |
| Vaginoplasty          | surgery to fix the vagina   |
| Vagotomy              | surgery to cut the vagus nerve or nerves, usually done to slow down<br>the making of stomach acid                           |
| Vagotonis             | increased activity of the vagus nerve causing slow heart rate or low blood pressure   |
| Valvuloplasty         | plastic repair of a valve, esp. of the heart  |
| Varices               | enlarged veins  |
| Varicose Veins        | twisted and bulging veins that are larger than normal   |
| Vas Deferns           | tube that carries sperm out of the testicle   |
| Vasectomy             | surgery to cut out part or all of the ductus deferens-done to make a<br>man not able produce children                       |
| Vasoconstrictor       | drug used to make blood vessels tighten up and become narrower  |
| Vasodilator           | drug used to make blood vessels open up and become bigger   |
| Vasospasm             | narrowing of the blood vessels in the brain   |
| Vasovasostomy         | surgery to undo a vasectomy by connecting up the ductus deferens<br>again-done to make a man able to produce children again |
| VDRL Test             | blood test used to detect syphilis  |
| Vector                | a carrier, usually an insect, that carries and transmits disease<br>causing microorganisms                                  |
| Vein                  | the type of blood vessel that carries blood back to the heart from<br>the rest of the body                                  |

| Vein Ligation And Stripping | surgery to remove twisted (varicose) veins in the legs  |
|-----------------------------|---|
| Vena Cava                   | largest vein in the body  |
| Venipuncture                | entering the vein with a needle   |
| Venipuncture                | putting a needle into a vein  |
| Venogram                    | x-ray of a vein   |
| Ventilator                  | machine used to help a person breathe   |
| Ventral                     | toward or having to do with the front of the body   |
| Ventricle                   | small space, such as one of several that hold spinal fluid inside the<br>brain and the two lower chambers of the heart  |
| Venule                      | little vein   |
| Verruca                     | wart  |
| Vertebra                    | one of the 33 bones in the spine  |
| Vertebral Column            | the spine   |
| Vertebrocostal              | having to do with a vertebra and a rib  |
| Vertical Transmission       | spread of disease   |
| Vertigo                     | light-headedness; dizziness   |
| Vesicle                     | blister   |
| Vesicourethral              | having to do with the urethra and the bladder   |
| Vesicovaginal Fistula       | abnormal opening between the bladder and vagina   |
| Videotape                   | a tape played on a VCR to watch and listen to   |
| Viral                       | having to do with a virus   |
| Virus                       | a minute particle that lives as a parasite in plants, animals, and bacteria<br>and consists of a nucleic acid core within a protein sheath; viruses cause<br>diseases |
| Virus                       | tiny type of gene   |
| Visceral                    | having to do with the internal organs   |
| Vital Signs                 | blood pressure, heart rate, breathing rate, temperature, weight, height   |
| Vitreous Body               | jelly-like liquid found in the back chamber of the eye  |
| Void                        | urinate   |
| Voluntary                   | individual is free to decide if they will take part in the study  |
| Volvulus                    | twisting of the intestines causing a blockage   |
| Vomit                       | matter discharged from the stomach out of the mouth   |
| Vulva                       | the tissues around the opening to the vagina  |
| Vulvectomy                  | surgery to remove the vulva   |
| Vulvovaginal                | having to do with the vagina and vulva  |
| Vulvovaginitis              | inflammation of the vagina and vulva  |

| W                             |  |
|-------------------------------|--|
| Washout Period                | period when receiving no treatment   |
| Wheal                         | hive; welt   |
| White Blood Cell Differential | blood test to find out the types and numbers of mature and<br>immature forms of white blood cells that are in the blood  |
| White Blood Cells (WBCs)      | cells that fight infection; a decrease can lead to an increased risk of infection  |
| White Cell Count              | number of white blood cells in the blood   |
| Whooping Cough (Pertussis)    | bacterial infection, usually seen in young children, in which there is<br>a serious, loud, dry cough   |
| Withdraw, Discontinue         | stop taking part   |
| Womb                          | Uterus   |
| Χ                             |  |
| Xanthochromic                 | having a yellow color  |
| Xanthoderma                   | yellow color to the skin   |
| Xanthosis                     | yellow color   |
| Xeroderma                     | dry skin   |
| Xeroma                        | abnormally dry membranes of the eye  |
| Xerophthalmia                 | abnormal dryness of membranes of the eye due to vitamin A<br>deficiency; symptoms may begin in the form of night blindness,<br>and they become progressively worse |
| Xerostomia                    | dryness of the mouth due to dysfunction of the salivary gland  |
| Xiphoid Process               | lower part of the breast bone  |
| X-Ray                         | an image of a site produced on photographic film by<br>X-rays passing through the site   |
| Ζ                             |  |
| Zygote                        | the cell made by joining of the female egg and male sperm at the beginning of pregnancy  |
