

SPECIAL PRESENTATION

Candidate for Director Tahoe Environmental Research Center

Dr. Michael McGlue

“Research Highlights and Vision for the Tahoe Environmental Research Center”

(Followed by a question & answer period)

Monday, June 17, 2024

8:30am – 9:30am

3102 Gallagher Hall (540 Alumni Ln, Davis, CA 95616)

[Zoom](#) Meeting ID: 994 2847 8111 | Passcode: 231392

Dr. Michael McGlue is the Alumni Endowed Professor and Interim Chairperson in the Department of Earth and Environmental Sciences at the University of Kentucky (UK). He holds an B.S. in Geology (2000) from Washington and Lee University, an M.Sc. in Earth Science (2004) from Syracuse University, and a Ph.D. in Geosciences (2011) from the University of Arizona. Prior to joining UK, he worked as a Mendenhall Post Doctoral Fellow at the U.S. Geological Survey in Denver, CO. His student-centered research group uses sediments and fossils to evaluate the impacts of climate change and human activity on inland waters. In aquatic ecosystems throughout the world (with special emphasis on the East African Rift Valley, Pantanal Wetlands, Sierra Nevada, and Grand Tetons), they have conducted multi-disciplinary analyses designed to answer questions related to hydroclimate change, the evolution of biodiversity, fisheries conservation, human-landscape interactions, and natural hazards. Dr. McGlue is a National Geographic Explorer and an NSF EPSCoR RII Track 1 awardee.
