**Title: Husbandry Care of Goats**

---

I. Purpose:

The purpose of this policy is to outline the minimum standards of care for goats  
II. Policy:

All units providing animal care for goats used in agricultural research and teaching must meet or exceed these minimum requirements based on the Guide for the Care and Use of Agricultural Animals Used in Research (*Ag Guide*). Goats used in biomedical research and non-standard agricultural teaching must additionally meet the requirements in the USDA Animal Welfare Regulations (*AWR*), and the Guide for the Care and Use of Laboratory Animals (*Guide*). Deviations or exceptions must be approved by the Attending Veterinarian and the IACUC.

III. Procedure:

**Daily (365 days a year without exception):**

- Observe each animal and check for health concerns (*AWR* 2.33).
- Ensure adequate feed and potable water is available (*Guide* pg. 65-68).
- Record and report sick animals to designated clinical veterinarian per standard operating procedure
- For temperature-controlled housing, record minimum and maximum temperatures and humidity.
  - Temperature range for goats is 61°F to 81°F (*Guide* pg. 44).
  - Humidity range for goats is 30% to 70% (*Guide* pg. 44).
- Spot clean cage, removing animals unless sufficient space is available for the animals to remain dry (*AWR* 3.131).
- Remove and replace any enrichment devices that are worn, damaged, or heavily soiled (*Guide* pg. 72)
- Clean and organize room, anterooms, and surrounding premises (*Guide* pg. 72).
- Record daily completion of each task, initial each task, and date the log.

**As needed:**

- Disinfect the animal room including walls, floors, and ceilings (if possible) (*Guide* pg. 72).
- Dairy does may need milking as often as necessary for the health of the animal.

## UC Davis Office of the Attending Veterinarian Standards of Care

- Remove and replace worn or damaged equipment from primary enclosures and surrounding facility (*Guide* pg. 72).
- Chow must be discarded after 6 months of the milling date unless manufacturer guidelines recommend a shorter or longer expiration date (*Guide* pg. 66).
- Clean and sanitize feed storage containers (*Guide* pg. 67).
- Each facility will develop their own best practices for sanitization of the macroenvironment typically occurring every 6 months or whenever there is a change in species.

### **Environmental Enrichment:**

- Refer to the Environmental Enrichment policy ([SOC-30-102](#)).

### **Facilities:**

- Temperature alarms must be installed in all temperature-controlled rooms housing goats (*Guide* pg. 143).
- Adequate ventilation must be provided for the health and comfort of the animal at all times.
  - A minimum of 10-15 fresh room air exchanges per hour shall be provided in animal housing areas (*Guide* pg. 46).
- Floors shall be moisture-resistant, non-absorbent, impact-resistant, and relatively smooth (*Guide* pg. 137). Refer to Physical Plant SOC 50-102.

### **Housing:**

- Whenever possible, goats should be socially housed in compatible groups (*Guide* pg. 51).
- Floor space taken up by food bowls, water containers, and enrichment devices should not be considered part of the floor space (*Guide* pg. 56).
- Space requirements for agricultural research and teaching goats can be found in Table 10-1 of the *Ag Guide* pg. 142.
- Space requirements for biomedical research goats can be found in the *Guide* pg. 62 (see appendix 1).
